COL-203800

An unexplained disease all across the world. Exactly what happened before.

What era will this storm take us to?

The immunity zone in Nowa Miedź is connected to a certain building.

The locals say it's haunted.

Survivors of the temporal anomaly took refuge here.

Where were you on the 31st of December, 1999?

Right there. Where you're standing now.

Repair the dome? We're only here for the immunity zone; did you forget that?

Rubble gets recycled, time moves forward, life goes on—that is the law of nature.

No theory, no model, can ever escape the bounds of its own limits.

I have seen your drawings. You don't understand this place … Mistakes, all over.

The public is advised to not leave home unless absolutely necessary!

The sky looks eerie …

Time is running out.

When the temporal anomaly comes, I'll stand under the dome …

… with everyone here and face whatever comes together.

It all begins in the past. Begins with the hopes you carry.

We chose this direction; we push forward together.
