COL-100500

Your watch was telling the wrong time.

Pardon me?

I fixed it for you.

2007?

Yeah.

This is the year 2007,

is it not?

We believe everything

can be translated into numbers.

Things are made up of numbers.

And mathematics is the key to opening the gate of truth.

How is this possible ...

You use a math model to forecast the "Storm" ...

And its results perfectly match what the Foundation recorded!

We just worked out the patterns in the number sequences.

Close your eyes, Vertin.

Truth reveals itself to you.

Truth?

Timekeeper, watch out!!

Who broke the silence?!

Sonetto is in detention. They are planning to sentence her to death.

Those of you who agree to the death sentence

may remain seated.

Who wish to commute Ms. Sonetto's punishment,

put your pebble into the pot in the middle of the hall.

The pure-blood arcanist community,

the unknown arcanum power,

and the obsession with certain knowledge or identity ...

sound familiar?

I take not thought for needless disputes.
