COL-2038500

A world that champions science, rationality, and order.

I think you might like it here after all, Mesmer. Think of it as a paid vacation.

I won't deny the appeal.

But since I'm here with you two, I'd call this a business trip at best.

They look ... beautiful.

They gave these robots emotions?

Our artificial intelligence models allow them to serve as your very own robotic friends!

Detecting abnormal, hostile behavior.

Oh, I didn't expect you two to find out.

I can't feel my legs ...

Somebody ... help me ...

Crispy critters! We're running out of tapes!

Please hurry, Vertin.

Hold tight, Comrade Doctor.

This melody sounds familiar!

Do you like it, Granny Zina?

You have great taste, kid.

It's time to go.

Let's roll, kids!
