遥远的永恒
Eternity From Long Ago

苏菲亚： 37，37！
Sophia: 37, 37!

苏菲亚： 快瞧我刚刚打的水漂！
Sophia: Look at the trail I made in the water!

37： 嗯，我数过了，最终的结果是数字 4。
Thirty-seven: Yes, I was counting, the end result was the number 4.

37 走到苏菲亚身边，认真地竖起四根手指。
37 walked over to Sophia, raising four fingers seriously.

37： 这说明你的行为非常正确。“4”意味着正义与力量。
Thirty-seven: That means what you did was spot on. "4" signifies justice and strength.

苏菲亚： 太好了！
Sophia: Wonderful!

苏菲亚： 再来一下，这次我会打出更多水花。
Sophia: Let me try again, I'll try to make more skips this time.

苏菲亚： 一，二，三……
Sophia: One, two, three ...

苏菲亚兴致勃勃地捡起石子，却迎来了同伴不解的目光。
Excitedly, Sophia picked up a few more smooth pebbles, only to receive a puzzled look from her companion.

37： 你已经得到了正确答案，为什么要再丢一次石头?
Thirty-seven: You got the right answer already. Why throw more?

苏菲亚： ……?
Sophia: ... ?

这是一个未曾预想过的问题，她停下动作，困惑地望向身旁的同伴。
The question made Sophia pause, and she matched her puzzled face.

而 37 显然更为疑惑。
But 37 seemed to be the more confused.

37： 数字并不是越大就越好。如果你是想检验投掷技巧，4 是最合适的数字。
Thirty-seven: Bigger numbers aren’t always better. If you're testing your throwing technique, 4 is the best possible number.

37： 还是说，你想检验的是其他数字？如果你追求热诚和协调，5 就会更好！
Thirty-seven: Or do you want to test your passion and coordination? 5 would be better for that!

苏菲亚： 不，我并没有想检验什么数字……这，这只是个游戏……
Sophia: No, I’m not trying to test any number ... It's a game ...

红发的女孩儿陷入了短促的窘境。
The red-haired girl felt caught in the awkwardness of the moment.

她踏上这座岛屿的时间还太短暂，这些数字在运算之外的概念也时常让她费解。
She hadn’t been on the island for very long, and the seriousness with which they took arithmetic still left her feeling alien.

好在她有个擅长于此的岛上伙伴。
Thankfully, she had a companion who was well-versed in these matters.

37：游戏……哦，游戏！
Thirty-seven: A game ... Oh, a game!

37：你是说像“科塔博斯”那样，在餐后酒会上用双耳杯泼掷葡萄酒液的游戏吗？
Thirty-seven: Like kottabos, where you fling wine dregs from two-handled cups at dinner parties?

苏菲亚：……我想，我想是的？这听起来和打水漂有些相像……
Sophia: ... I guess so. I mean it almost sounds like skipping stones ...

女孩小心地表示着赞同。她并不知道这游戏的具体所指，只是不想让话题僵住。
She had agreed without really understanding the specifics, but not wanting the conversation to stall.

——也不让她的玩伴失望。
... or to disappoint her new friend.

37：噢……好吧。
Thirty-seven: Ah ... alright.

37：我完全不明白这些有什么意义。
Thirty-seven: I don't get the point of all this.

苏菲亚：哎……？
Sophia: Huh ... ?

37 耷拉下了眉毛——她现在的表情可称大失所望。
37's brow furrowed—as if let down by her companion.

37：投掷葡萄酒液或是鹅卵石片，击中浮碟或是水面，让碟子沉下，又或者让石片在水面上弹射数下——
Thirty-seven: Throwing wine or pebbles, hitting a target, sinking a plate, or skipping stones on water—

37：这种行为究竟有什么意义呢？人们到底想从中得到什么呢？
Thirty-seven: What's the point of these actions? What are we trying to achieve?

37：如果是为了在数字上分出高低，我能明白。就像 210，他总是致力于成为科塔博斯的第一得分手。
Thirty-seven: If it's about being the highest-ranked, I get it. Like 210, he's always trying to get the top score in kottabos.

37：小一点的那个 6 也是，他总是在尽可能地追逐数列的末端。
Thirty-seven: So is 6. He's always chasing the end of each series.

37：可有时候人们好像没有任何目的，只是在重复这一行为。
Thirty-seven: But sometimes it seems people do things without any purpose at all.

苏菲亚：唔，他们应该只是在玩吧？
Sophia: Well, they're just playing.

苏菲亚：因为游戏就是这样，只是和朋友们待在一起，单纯地度过一段愉快的时间……并没有什么特定的目的，我想。
Sophia: That's what most games are about—spending time with friends and having a fun time ... without any greater purpose, I guess.

37：……玩？
Thirty-seven: ... Fun?

37：也就是说，他们没有任何超越的目的吗？
Thirty-seven: You mean ... these things don't have any transcendent purpose?

37：他们没有提升自己的序列，也没有追求到什么知识；没有净化自己的灵魂，更没有醉心于真理的求验。

Thirty-seven: They don't climb up the hierarchy, seek knowledge, purify their souls, or seek out the truth?

37：只是在感官世界里毫无目的地耽误了一段时间……是这样吗?

Thirty-seven: So all they're doing is idling in the sensory world.

女孩的语气变得冷淡而充满疑惑，这是苏菲亚始料未及的。

The young girl's tone grew much more distant, even cynical, surprising Sophia.

苏菲亚：不，我想，我想也不全是……

Sophia: No, I think ... well, it's not entirely like that ...

苏菲亚：抱歉，37，我刚来这里，还有很多事不明白，如果我说错了——

Sophia: Sorry, 37 ... I'm new here, and there's a lot I don't understand. If I'm wrong—

蓝发女孩只是托住下巴，一门心思地琢磨着。

The blue-haired girl was resting her chin in her hands,she had already drifted away in thought.

37：唔，抱歉，你刚刚说什么?

Thirty-seven: Oh, sorry, what were you saying?

37：没关系，这都是些琐事！我们应该有更重要的事要做。

Thirty-seven: Never mind these trivial matters! We have more important things to do!

37：妈妈让我来带你熟悉岛屿。那么，你想在沙滩上验证的数字就是 4 了吗?

Thirty-seven: Mother asked me to familiarize you with the island. So, is 4 the number you wanted to validate on the beach?

苏菲亚：……

Sophia: ...

苏菲亚没来得及完成道歉，因为 37 已经迅速地将之抛到脑后。

Sophia tried to finish her apology, but 37 dismissed it with a wave, she was already caught in another train of thought.

这样的事以后还会反复发生多次——直到她终于习惯为止。

This kind of thing would happen several times until she got used to it.

但现在，幼鸟炽热的心还未被海风与礁石打磨，因此她还会再三发问。

But back then, her still-fledgling heart was unpolished by the sea breeze and sand, and she was full of questions.

苏菲亚：37，我想我还是不太明白……你们“阿派朗”对数字的信仰。

Sophia: 37, I still don't quite understand ... this"Apeiron" belief in numbers.

苏菲亚：在来到岛上前，我也经常和数字打交道，但那只是学习应用一些基本的运算技巧。

Sophia: Before coming here, I dealt with numbers in my studies, but it was just arithmetic.

苏菲亚：在解出题目时，父亲会奖励我一颗糖，我把它们攒在罐子里卖掉，好在去医院前给母亲买一束花……

Sophia: When I solved problems, my dad would reward me with a candy, and I'd save them in a jar to buy flowers for Mom before going to the hospital ...

37：……?

Thirty-seven: ... ?

苏菲亚意识到自己说得太多了。这绝非适宜的场合，这样的谈话也不适用于她的这位新朋友。

Sophia realized she was saying too much. It wasn't the right context, nor did it concern her new friend.

苏菲亚：……总之，我对数字的印象还停留在那些课本上的练习题。它们远没有这些抽象的，超验的，信仰上的意义。
Sophia: ... Anyway, my impression of numbers is all caught up in those textbook exercises. Far removed from these abstract, transcendent meanings.

苏菲亚：为什么你们会相信它们是永恒的呢?
Sophia: Like I don't understand, why you believe that numbers are eternal?

37：唔？因为它们就是永恒的啊！
Thirty-seven: Because they are eternal!

37 那些令人费解的话语越发增多，令苏菲亚几乎后悔问出这个可称冒犯的问题。
37's answer, more a declaration, was yet more puzzling, making Sophia regret asking at all, and risking offense.

好在，质数是机灵的——从来都是。
Thankfully, prime numbers like 37 are nimble-minded—at least that is what she would say.

37：我不知道该如何回答你……但我想到一个非常合适的例子！
Thirty-seven: I don't know how to explain it with words ... But I have the perfect example!

37：是欧几里得曾做出的，关于存在无穷多个质数的证明。
Thirty-seven: It was Euclid who once proved that there are an infinite number of prime numbers.

苏菲亚：质数……那是，你的数字?
Sophia: Prime numbers ... Like how 37 is a prime number?

37：是的，13 是质数，23 也是质数，37 也是质数，337 也是质数！它们的因数只有 1 和它们自己，无法被其它自然数整除。
Thirty-seven: Yes, 13 is prime, 23 is prime, 37 is prime, and 337 is also prime! Their factors are only 1 and themselves. They cannot be divided by any other natural number.

37：质数可以无限地罗列下去。可是，我们怎么证明这一点呢?
Thirty-seven: Prime numbers can go on infinitely. But how can we prove this?

她兴致勃勃地在沙滩上写下一串数列，并在末端画上一个圆。
37 enthusiastically wrote a series of numbers in the sand, finishing with a circle at the end.

37：欧几里得的方法是，先设想存在一个最大的质数——就是这个○。
Thirty-seven: Euclid's method is to imagine the existence of the largest prime number—this is ○.

37：那么我们就得到了完整的质数序列：从最小的 2 开始，一直写到最大的○。
Thirty-seven: So, we make a complete series of prime numbers: starting from the smallest 2, all the way to the largest ○.

37：在这基础上，我们设想存在一个更大的数，△。
Thirty-seven: Based on this understanding, let's imagine there's a larger number, △.

37：△代表所有序列里的质数相乘，再加上 1。
Thirty-seven: △ represents the multiplication of all prime numbers in the queue, plus 1.

37：很明显，它不能被所有列举出来的质数整除，用 2、3、5……○里的任何一个数去除，都会余 1。
Thirty-seven: Clearly, it cannot be divided by any of the listed prime numbers. The numbers 2, 3, 5 ... or any number represented by ○ will result in a remainder of 1.

37：如果△不是一个质数，那么根据定义，它理应被一个比○更大的质数整除。
Thirty-seven: If △ is not a prime number, it should be divisible by a prime number larger than ○.

37：如果△是一个质数，那它自身就是一个比○更大的质数。
Thirty-seven: If △ is a prime number, then naturally it's larger than ○.

37：这二者都违反○是最大质数的假设，矛盾！
Thirty-seven: Both scenarios contradict the assumption that ○ is the largest prime number.

37：所以，结论就是——不存在这样一个最大的质数○。质数是无限的。
Thirty-seven: Therefore, the conclusion is—there's no such thing as the largest prime number ○. Prime numbers are infinite.

37 结束了书写，她拍拍手掌，抖落沙粒，从沙滩上站起来。
37 finished writing, clapped her hands, shook off the sand, and stood up beaming.

苏菲亚：我……在学校听过这个定理。可是，我还是不明白……
Sophia: I ... heard about this theorem at school. But I still don't understand what it means, really ...

她仍不明白这样具体的数学定理中存在什么超验的含义。
She couldn't grasp the transcendental meaning behind such specific mathematical theorems.

对她而言，它们严格、正确，就像讲台上粉笔的硫酸钙颗粒，单调，质地鲜明，难溶于水。
To her, they were strict, correct, but nothing more than chalk particles on a blackboard, monochromatic, sharply defined, and barely soluble in water.

——也仅仅如此。
—And that was all.

37：……妈妈告诉我，欧几里得曾在两千多年前写下了这个证明。
Thirty-seven: ... Mother told me Euclid wrote down this proof over two thousand years ago.

37：写下这个证明的人会死亡，记录这个证明的草纸会被腐蚀，读到这个证明的我们也会消失不见。
Thirty-seven: She said, "The person who wrote this proof will die, the paper that recorded this proof will decompose, and we, who read this proof, will also one day disappear."

37：一切都会像海边的砂砾一样被冲刷殆尽。
Thirty-seven: Everything will be washed away like sand on the seashore.

37：可是这个证明却依然正确、优美、精巧，令每一个后来者驻足欣赏。
Thirty-seven: But this proof will endure, always correct, beautiful, and intricate, to be admired by every future generation.

37：——我想，这就是永恒。
Thirty-seven: —I suppose that's eternal.

苏菲亚：……！
Sophia: ... !

37：岛上的每个人都告诉我，我是特殊的。
Thirty-seven: Everyone on the island tells me I'm special.

37：因为质数就像是算术大厦里的基石，一切整数都是由质数相乘得来的。
Thirty-seven: Prime numbers are like the foundation stones of arithmetic. All integers are derived from prime numbers.

37：但我只是无穷多个质数的其中之一。永远有更多、更新的数字，我并不特殊。
Thirty-seven: But I'm one of a set of infinite prime numbers. There will always be more, newer numbers; so I'm not truly special.

37：可即使我仅是 37，沙滩上可数的 37 个点，我也依然被包含在了这个无穷的序列里。
Thirty-seven: But even if I am just 37 ... 37 grains of sand on the beach ... I'm still encompassed within this infinite queue.

37：——而这样的数列还有无穷个！整数的序列，分数的序列，无理数的序列……它们都是无穷的！
Thirty-seven: —And there are an infinite number of such sequences! Sequences of integers, sequences of fractions, sequences of irrational numbers ... Each and every one infinite!

37 转过头来，现在她的眼睛和阳光下的砂砾一样闪闪发光了。
37 turned around, and now her eyes sparkled with the grains of sand in the sunlight.

37：我们每个人都是无穷的一部分，我为此感到骄傲。
Thirty-seven: We're all a part of infinity, and I take pride in that.

37：——我想，苏菲亚，这就是无限。
Thirty-seven: —I think, Sophia, that is what eternity is.

日光映照之下，砂砾宛如黄金。与 37 对视时，她感到一阵炫目与刺痛。
Under the bright sunlight, the grains of sand of the beach gleamed like gold. As she locked eyes with 37, it was blinding yet poignant.

37：别闭上眼睛，教典说："面对任何美丽的事物都不应回避。"
Thirty-seven: "Don't close your eyes", as the scripture says, "Do not shy away from anything beautiful."

苏菲亚：……啊……
Sophia: Oh ...

苏菲亚：很久以后，我仍会想起 37 告诉我的这个定理。
Sophia: As time passed, I often remembered the theorem 37 told me.

苏菲亚：我从未真正领略过她的世界，那是一个奇妙而抽象的数学王国，所有数字都是她的朋友。
Sophia: I never quite understood her world— this fascinating, abstract kingdom of mathematics where every number is her friend.

苏菲亚：可那时在她的眼里，我的确短暂见到了"永恒"那美丽的光辉。
Sophia: But in that moment, I caught a fleeting glimpse of the beautiful brilliance of "eternity" in her eyes.

苏菲亚：如此迷人……如此令人向往和歆羡。
Sophia: It was enchanting ... inspiring and admirable.

苏菲亚：它成为了我吸纳学派信仰的火种。
Sophia: It became the seed that led me to embrace the school.

苏菲亚：沙滩也的确在往后的日子变得不同。
Sophia: The beach changed in the days that followed.

苏菲亚：船只驶近岸边，"流溢"在眼前发生，欢呼变为悲叹和啜泣。
Sophia: The ship approached the shore, the "Emanation" unfolded before our eyes, and cheers turned into sorrowful cries.

苏菲亚：最终，只留下了这些冷冰冰的几何体。
Sophia: Eventually, all that remained of what we lost were cold, lifeless geometric shapes.

苏菲亚：但 37 从未因此动摇。
Sophia: Yet, through it all 37 stood unwavering.

苏菲亚：她带着惊人的专注投入她母亲留下的研究，不曾露出任何悲伤和怯意。
Sophia: She poured incredible focus into her mother's research, never displaying any sadness or hesitation.

苏菲亚：就像她那天在沙滩上提及的证明一样，永恒，坚决，不被时光冲刷。
Sophia: Just like the theorem she spoke of that day on the beach—unchanging, resolute, immune to the passage of time.

苏菲亚：——为何 37 可以这样独特，从不被外界改变?
Sophia: —How could 37 stay so uniquely unaffected by the world around her?

苏菲亚： ……

Sophia: ...

苏菲亚： 我无法解答出这个问题，只能为她提供微不足道的帮助。

Sophia: I couldn't find an answer to that question; all I could do was offer her my help, meager as it was.

儿童游戏

A Children's Game COL-306602

儿童游戏

A Children's Game

苏菲亚： 研究室的灯泡该换了，演算用的纸张或许也该多备一些……

Sophia: The lab's light bulb needs changing, and we may need more paper for calculations ...

苏菲亚： 上次 37 还提出过，需要……

Sophia: 37 mentioned last time that we need—

教众 II： 哦，苏菲亚！

Believer II: Oh, hey, Sophia!

教众 II： 你走得这么急，又有要忙的事儿吗？

Believer II: You look like you're in a rush. something urgent?

苏菲亚： 算不上忙，只是去研究室看看 37 的进展。

Sophia: Not exactly, I'm just heading to the lab to check on 37's progress.

教众 II： 37……说起来也有好一阵子没见到她在这片沙滩出现了。

Believer II: 37 ... It's been a while since she's made an appearance on the beach.

教众 I： 大概要演算那些留下的资料吧？毕竟其他人也没法接手……

Believer I: Perhaps she's still digging into those remaining records? No one else can handle them ...

每当提及“流溢”，气氛总会稍显沉重。

Every time the "Emanation" came up in conversation, the atmosphere seemed to darken in response.

喊住苏菲亚的女性面露关切，试图将对话唤回寻常的道路。

It was as if navigating around the edge of a storm.

教众 II： 别太担心，37 会找到结果的。

Believer II: Don't worry, 37 will figure it out.

教众 II： 你们也要多注意些身体，别把自己累坏了。

Believer II: And hey, take care of yourselves. Both of you. We don't need you to wear yourselves out ...

苏菲亚： 好的，非常感谢两位。

Sophia: Thank you both so much.

苏菲亚： 她伸出手，在身前描绘着象征祝愿的图案。

Sophia: Sophia extended her hand in a gesture of goodwill.

交换过彼此的关心，是时候继续迈开脚步。

After sharing those brief pleasantries, it was time to continue on their way.

岛屿 · 研究室
Laboratory, Island

爬满凌乱笔迹的草稿纸，堆放在各处的厚重书籍，魔精掉落的毛发……
Scattered scribbled notes, piles of thick books, and stray strands of critter hair ...

仿佛有一群阿其翁曾光顾此地，或是这间研究室已在洋流中无休止地打转了数百年。
It looked as if a flock of Abraxas had visited, or the lab had been caught in a whirlwind for centuries on end.

任谁见到这副景象，都会由衷地感到疲惫。
Anyone would have been exhausted by such a sight.

而研究室的主人正趴在桌前，安心地沉入美梦。
And amidst the panoply the lab director herself lay sprawled across a table, lost in her own head.

苏菲亚： 唉，37。你就从没想过试着自己打扫房间吗?
Sophia: Umm ... 37 ... Have you considered tidying up this room?

她放轻动作，跨过地面的书本小山，逐步靠近那张长桌。
She moved nimbly, stepping over scattered books, as she approached the long table.

放在 37 手边的笔记本看上去格外眼熟。
The notebook which lay beside 37 looked oddly familiar.

苏菲亚： 这是……
Sophia: Is this ...

曾经的使用者十分珍惜这本笔记，其中的图画与注解工整清晰。
Someone had treasured this notebook, adorning it with illustrations and notes.

翻过一页，两页，数十页，是一行行数据校验记录，伴以少量工程绘图。
Flipping through its pages, Sophia found meticulous data validation records accompanied by engineering sketches.

又翻过几页，内容开始与这座岛屿上的事物相关，偶尔混有乐谱与简单的涂画，记录着飞过的海鸥和一个小姑娘玩耍的身影。
After a few more pages, the content started relating to things on the island, interspersed with sheet music and simple sketches, documenting seagulls flying by and the silhouette of a little girl playing.

最终，手指停在了绘有方格，写着几道题目的纸页之上。
Finally, her fingers halted on a page with grids and a few math problems written on it.

37： 唔……苏菲亚？你来啦！
Thirty-seven: Oh ... Sophia? You're here!

37 揉了揉眼睛，目光很快转向了好友手里的笔记本。
37 rubbed her eyes and quickly shifted her attention to the notebook Sophia was holding.

37： 噢，我刚才找东西的时候发现了这个小本子！
Thirty-seven: Oh, I found this little book while looking through the one of these piles!

37： 休在里面写了很多有趣的内容，我想看看有没有和“流溢”相关的记录。
Thirty-seven: There’s an absolute plethora of notes inside. I wanted to see if there were any records relating to the "Emanation".

37 直起身，仔细打量着苏菲亚正在阅览的一页。
37 straightened up, carefully inspecting the page Sophia was reading.

苏菲亚： 我记得这一页……那时候我还很小，踮着脚才能够到父亲的桌面。
Sophia: I remember this page ... I was so young then, standing on my tiptoes to reach my father's desk.

苏菲亚：我告诉他，我的朋友对一切游戏似乎都不感兴趣，而我又对数学犯愁……
Sophia: I told him how my friend seemed uninterested in games, and that I was struggling with math ...

苏菲亚：父亲就拿来矮凳，让我站得足够高，能看见他在笔记本上写下的字迹……
Sophia: He brought a stool so I could see the words as he wrote in his notebook ...

苏菲亚：……抱歉，这并不是什么重要的事。
Sophia: ... Sorry, this isn't really important.

她合上笔记，转而望向一旁的 37。
She closed the notebook and turned to 37.

苏菲亚：里面都是为孩子设计的题目，对你来说确实太过简单。
Sophia: These are riddles for kids, far too simple for you.

苏菲亚：不必把时间花在这些不重要的地方，大家还等着你公布下一阶段的研究成果呢。
Sophia: Don't waste time on them ... Everyone's waiting for the next phase of your research.

苏菲亚：这本笔记我会带走收好的。
Sophia: I'll take this notebook with me.

37：不不，苏菲亚！它们并不只是给小孩子的问题——
Thirty-seven: No, Sophia! These aren't just for kids—

37：我刚才发现题目的答案是一组有趣的数列！
Thirty-seven: I just found out that the answers form an interesting sequence!

37：它们很可能与天体音律有关系，这不是休常常关注的知识吗？
Thirty-seven: They might relate to celestial rhythms, that's Hugh's area of study, right?

37：你瞧，这个数与下一个数之间似乎符合八度音阶的规律……
Thirty-seven: Look, this number seems to follow an octave pattern with the next one ...

37：旁边标注的符号也非常特殊！
Thirty-seven: And these symbols are unique too!

37：它们都与 3 有关系，这一定是用三角形组合成的小把戏！我已经尝试了好几种解法……
Thirty-seven: They’re all related to the number 3. It must be a trick using a combination of triangles! I've tried several solutions ...

37 认真地一项项列举出她所发现的“有趣的内容”。
She listed one intriguing discovery after another.

她滔滔不绝，专注而热情，且因此闪闪发亮。
37 pontificated, glowing with increasing focus and enthusiasm.

正如过去在海滩上的讲述，以及此后无数个日夜对“流溢”的研究。
It was reminiscent of her past lessons on the beach and countless nights researching the "Emanation".

抱持着强烈的好奇心，对凡事都要瞧个究竟。
Armed with that intense curiosity, she sought answers in everything.

——一如既往，从不变改。
—Unwavering, unchanging.

苏菲亚：……好吧。
Sophia: ... Fine.

苏菲亚：既然这样，我会帮助你找出答案的，37。
Sophia: If that's the case, then I'll help you find the answers, 37.

苏菲亚：但我们要抓紧时间，之后你就会把精力放回到主要的研究上来，对吗?
Sophia: But let's be quick. Afterward, you'll refocus on your main research, right?

37：当然！我很确定这要不了多久！
Thirty-seven: Of course! It shouldn't take long, I'm almost certain!

37：首先我们得先找个够宽敞的地方，就像笔记本里写的……
Thirty-seven: First, we should find a spacious spot, something close to the one described in the notebook ...

笔记本在 37 的手中翻得哗哗作响。
The notebook rustled in 37's hands.

她边从书页里捕捉着那点闪烁不定的灵感，边走向研究室的出口。
Her fingers skimmed the pages, capturing fleeting sparks of inspiration as she sped toward the lab's exit.

苏菲亚：唉。
Sophia: Sigh ...

苏菲亚：希望这的确要不了多久……
Sophia: I hope this won't take too long ...

苏菲亚：……我这样任由她浪费时间，真的好吗?
Sophia: ... should I really let her waste time like this?

TO BE CONTINUED…
TO BE CONTINUED...

海滩漫步
Beach Walking COL-306603

海滩漫步
Beach Walking

沿着来时的路在海滩上漫步，所见的情景与方才并无不同。
Strolling along the familiar path on the beach, everything looked as it did before.

泥土只是泥土，沙砾只是沙砾。
The sand was sand, rocks ... only rocks.

它们都是物质世界的表象，与超验性相去甚远。
Earthly elements, far divorced from anything transcendental.

但在海边散步有助于沉思真理——这是学派不成文的教义。
But it was an unwritten doctrine of the school —a walk by the sea helped one contemplate the truth.

苏菲亚：啊，刚刚经过的时候还没见着这群海鸥。
Sophia: Oh, I missed that flock of seagulls!

苏菲亚：37，小心你旁边的——
Sophia: Careful, 37, next to you—

受惊的鸟类扑扇翅膀飞起，抖落沙粒与羽毛。
The startled birds flapped and cawed, shaking off in a flurry of sand and feathers.

而 37 只是顺手拂掉了落在纸上的杂物，满不在意地继续前行。
37 brushed away the debris that landed on her paper, continuing on without fuss ...

直到苏菲亚加快步子从后面追上她，37 才抬起头。
Sophia caught up with her, hurrying from behind, at last breaking her focus.

37：怎么了，苏菲亚?
Thirty-seven: Something wrong, Sophia?

苏菲亚：已经没事了。你有什么新发现吗?
Sophia: Oh- nothing. Any new discoveries?

37：暂时没有，但我现在清醒多了!
Thirty-seven: Not yet, but I've thoroughly dispelled the dark clouds from my mind.

是的，海风不一定对真理有所助益，但它一定能暂时吹散困倦。
The sea breeze may not aid in finding the truth, but it is invigorating, in its own way.

然而下一秒，她就打了个大大的哈欠。
But as if to challenge her claim, a yawn escaped her.

37：呼啊……好困……
Thirty-seven: So sleepy ...

教众小孩 I：瞧，是 37!
Child Believer I: Look, it's 37!

教众小孩 I：你又在做什么有意思的证明吗？我可以听听吗?
Child Believer I: Have you discovered anything interesting lately? Care to tell us about it?

教众小孩 II：噢……我们是不是该像 210 那样，称呼 37 为赫尔墨斯之星?
Child Believer II: Perhaps we should we start calling 37 the Star of Hermes, like 210 does?

教众小孩 II：我是说，听起来这像一种敬称……好吧，下午好，37!
Child Believer II: I mean, it sounds like an honor doesn't it ... Anyway, good afternoon, 37!

她们路过了一群正在玩耍的孩子，收获了热情的招呼。
They passed a group of children who overtook them with curiosity and warm greetings.

大家都见过 37 为了研究做出的各种举动，对她捧着一本笔记在海边漫步见怪不怪。
Everyone had known of 37's curious methods for her research and so few were surprised to see her strolling along the beach with the notebook in hand.

苏菲亚：下午好。你们在跳房子吗?
Sophia: Afternoon. Playing hopscotch?

苏菲亚：最好再远一点儿，否则海浪会把画好的线冲乱的。
Sophia: Better move a bit further, or the waves will mess up your lines.

37：海浪……海浪中的每滴水都在做圆周运动，当扬起的浪超过 120°时，它们就会“哗”地破掉。
Thirty-seven: Waves ... Each drop in the waves moves in a circular motion. When the crest of a wave exceed 120 degrees, they crash with a "whoosh."

37：看来答案的数列和海浪也无关，究竟是什么呢?
Thirty-seven: But the answer sequence seems unrelated with these waves. What could it be then?

她短暂地陷入了自己思想的困境之中。
She briefly dove back into in her thoughts.

朝她们迎面走来的领袖恰巧打破了这一境况。
But as their leader approached, she snapped out almost as quickly.

6：266，267……
Six: 266, 267 ...

6：……哦。
Six: Oh ...

领袖朝旁挪动步子，试图安静地让出道路。
The leader sidestepped them around them silently, as if trying to make a quick escape.

事情很少能如人们期望中那样发展。
Such efforts rarely turned out as expected for him.

37：6！你也在这儿！
Thirty-seven: 6! You're here too!

37：你在散步吗？为什么要沿着海滩边走边计数？
Thirty-seven: What methods are you examining with your walk? Are you counting your steps along the beach?

37：难道因为你是 6，就要走 6666 步……但这个数字并没有那么好，我建议……
Thirty-seven: Perhaps you are taking 6666 steps because you're 6? Oh! But that number isn't optimal, let me suggest—

6 巧妙地转移了话题，并未对 37 提出的数发表意见。
6 deftly avoided 37's quizzical advice and changed the subject.

6：……你为何不在研究室？
Six: ... Why aren't you in your laboratory?

37：我发现了一些休留下的题目，正在和苏菲亚一块儿尝试着解出它们。
Thirty-seven: I discovered some puzzles Hugh left behind, so I've opted to decode them with Sophia.

她愉快地扬了扬手中的笔记本，向 6 示意。
She happily waved the decorated notebook in her hand towards 6.

苏菲亚：是的。这些题目基本上只是儿童游戏，我能保证 37 不会浪费太多时间。
Sophia: These puzzles are mostly children's games, I can assure you 37 won't waste too much time on them.

37：——没错！
Thirty-seven: They are indeed rudimentary!

37：这就是我忽略掉的提示！多亏你，苏菲亚，我想到了！
Thirty-seven: Oh! I've figured out the clue I overlooked! Thank you, Sophia, I have it now!

37：正因为它们是游戏，所以只有亲自玩一遍，才能知道休的意思！
Thirty-seven: They're games! So you must play through them to understand Hugh's intention!

37：已经有三个参与者，你，我，6 也在……
Thirty-seven: And it just so happens there are already three of us—you, me, and 6—

领袖的头发丝几不可见地晃动了一下。
Imperceptibly, 6's hair stood on end, like a fight or flight response.

6：接下来我还有其他事务需要处理。
Six: Sorry, there are other matters that call to my attention.

37：可是我们以前也常一块儿玩耍的，不是吗？
Thirty-seven: We used to play together often, didn't we?

37：现在和往常也没有区别，因为时间不过是一条绳上的几个结，从哪头开始数都行。
Thirty-seven: The present is no different from the past, time is merely a procession of knots on an infinite rope. It doesn't matter where you start counting.

6：不，不必了。
Six: Thank you for your invitation, but ...

说话的同时，6 往后方退了一步。
As 6 spoke, he took a step back.

这是个巧妙的选择，暗示着对方对话应当就此结束。
The language was clear, implying that the conversation should end there.

但对 37 并不怎么管用。
Unfortunately, these social cues were lost on 37.

37：好吧，那我申请使用这片海滩，以及召集愿意参与游戏的人。
Thirty-seven: Excellent, I'd like to use this beach to gather anyone interested in the game.

37：我保证，它会在晚饭时间前结束的——但我不能忽视这个近在眼前的问题！
Thirty-seven: I assure you it'll be done before dinner—but we simply cannot ignore this pressing issue!

6：可以。
Six: Very well.

6 转而朝向苏菲亚，微微点头。
6 turned to Sophia, nodding an almost imperceptible plea to her.

6：请你负责检验 37 这项提案的可行性。
Six: Please evaluate the feasibility of 37's proposal.

6：告辞了。
Six: But I'm afraid I must take my leave.

他再次迈开脚步，忽然停顿了一秒。
He took a step forward, pausing for a moment.

37：从 268 开始。
Thirty-seven: I'll start from 268.

6：多谢。
Six: Thank you.

被打断的散步终于得以继续，37 也重回到思考中。
Finally, he resumed his interrupted walk, narrowly escaping 37's notice as she returned to her thoughts.

37：真是遗憾，6 是我们中最擅长谜语的人……
Thirty-seven: You know, 6 is the best riddle-solver among us ...

37：以前他还会说一些有趣的话，现在他已经快变成一个移动的朗诵卷轴了！
Thirty-seven: He used to say the most interesting things, but now he's become naught but a walking scroll!

苏菲亚：6 向来是学派的领导者。领袖总是需要公正，客观，正确且无可指摘的。
Sophia: 6 has become the leader of the school, and our leaders need to be even-handed, objective, forthright ... flawless.

苏菲亚：6 只是在履行自己的责任，我们都有自己要做的事。
Sophia: 6 has so many obligations. We all have our own tasks that need doing.

37：嗯——那对我来说，现在要做的事就是解出这些习题的真意！
Thirty-seven: Well—then, my task is to understand the true meaning behind these exercises!

她高高扬起了那本面向儿童的游戏集。
She raised the collection of children's games high.

对于承担了整座岛最重要研究的领航人来说，这不是一个合乎时宜的举动。
For the island's chief researcher, it wasn't the most fitting action.

苏菲亚：……37。
Sophia: 37 ...

苏菲亚：也许这些题目里根本就没有什么含义呢?
Sophia: Maybe these exercises don't have any meaning at all?

37：唔?
Thirty-seven: Huh?

37 眨了眨眼，似乎不明白她在说些什么。
37 blinked, as if Sophia's words had no imprint of meaning at all.

苏菲亚：我的意思是，它们只是面向孩童的游戏，而你已经知道了每道习题的答案。
Sophia: They are just children's games, and you already know the answers to each one of them.

苏菲亚：你认为答案的数字组合拥有什么深意，但也许它们只是一些随机数。相比之下，我们还有……
Sophia: I know you think the sequence of answers has some significance, but maybe they are just random numbers. All things considered, we still have—

这番对话本该还有一些内容，关于人们的期望，关于职责和义务。
Their conversation could have carried on about people's expectations, duties, and obligations.

可是海风突兀地盖过了她的声音。
But the sea breeze suddenly drowned out her voice.

37 也并未听见——也许她只是从不在意。
37 didn't hear her—or perhaps she didn't care to ...

37：是那几个孩子，快看!
Thirty-seven: It's those kids, look!

37 望着远处，视野内新的存在吸引了她的全部注意。
37 looked into the distance, completely engrossed in the next moment.

37：来吧，苏菲亚，抓紧时间，我去帮你问一问——
Thirty-seven: Come on, Sophia, hurry up. I'll help you ask—

苏菲亚：等等，别跑太快……
Sophia: Hold on, don't go so fast ...

话语追不上 37 扬起的衣角。她向来都是想到便去做的。
Her words were lost in the swaying of 37's robe as she dashed ahead.

自顾自地抛出点子，挥霍着灵感，却也能达到其他人无法企及的高度。
She was always one to act on her thoughts immediately. Seizing on every idea, and squandering her inspiration, yet she could reach heights others only dreamed of.

当她在晚餐时急急忙忙丢下面包跑出房间，在场的人都倍感疑惑。
Not long ago she rushed out of the canteen in the middle of dinner, bewildering everyone present.

但只隔了一天，《关于“流溢”分布范围的初步猜想》就被递交，并得到验证。
But a day later, she submitted her "Initial Speculation on the Distribution of the Emanation", which was just as soon verified.

面对询问，37 给出的回答是——
When asked about it, 37's response was understated—

“喔，这不算什么，我只是突然注意到这和芝麻粒的排列有相似之处！”
"Oh, I simply noticed a striking resemblance between the patterns of the Emanation and how my sesame seeds were arranged!"

苏菲亚：……这也是 37。
Sophia: ... It was her strange genius.

她弯腰捡起一块埋在沙中的卵石，试着将它抛向远处。
She bent down to pick up a pebble buried in the sand and tossed it as far as she could.

石块擦过水面，勾起数圈涟漪，与一串回忆。
As the stone skimmed over the water’s surface, it created several ripples, conjuring a stream of memories.

苏菲亚：呜……
Sophia: Waah ...

细弱的哭声撞在几何体光滑的表面，留下空洞的回音。
Faint sobs collided against the smooth geometric surfaces, leaving faint and hollow echoes.

而一阵急促的脚步遮去了所有动静。
But a hurried set of footsteps obscured any other sounds.

37：苏菲亚，太好了，你在这！
Thirty-seven: Sophia, you're here!

37：我要给你一个东西，你一定会感兴趣的！
Thirty-seven: I have something for you, something you'll be interested in!

37 递出的是一个玻璃瓶。
37 handed over a glass bottle.

瓶中卷起的纸条边缘参差不齐，似乎本是演算纸的一角。
The rolled-up paper inside looked jagged, as if it had once been a corner of a worksheet.

37：你不是一直想要知道你的灵魂数字吗？我看到了，我把它写了下来，就在这里！
Thirty-seven: You wanted to know your soul number, right? I saw it, so I wrote it down here!

她的语气一如既往地骄傲。
Her tone was as proud as ever.

那是属于“质数”的，坚硬而刺眼的光辉。
It was a "prime" number, one that carried a meaning of hard and piercing brilliance.

这段记忆被有意识地淡忘了。
It was a memory that was willfully forgotten.

在记忆的最后，玻璃瓶在空中划出一道弧线，落入海面。
In the last moments of her memory, the glass bottle traced an arc through the air, landing in the sea.

当涟漪散去，一切都复归平静。
As the ripples dispersed, calm returned.

37：苏菲亚，苏菲亚？
Thirty-seven: Sophia, Sophia?

友人的呼唤让她恍然回神。
Her friend's call brought her back to reality.

37：好极了，对这个游戏感兴趣的人比我想得还要多！
Thirty-seven: There are more people interested in this game than I thought!

一会儿工夫，37 就带着她找到的参与者回到这里。
In no time, 37 returned with the participants she had found.

她正充满信心，打算立刻开始进行尝试。
Shining with confidence, she seemed ready to start immediately.

37：现在必要条件都凑齐了，只要按顺序完成游戏就好。从第一题开始！
Thirty-seven: All the necessary conditions are met now. We need to proceed in order with the game. Let's start with the first question!

37：你也会来帮忙见证吗，苏菲亚？
Thirty-seven: Will you help by observing us, Sophia?

苏菲亚：……当然。
Sophia: ... Of course.

苏菲亚：我会为你们验证计算，勘校错误。
Sophia: I'll validate your calculations and check for any errors.

红发的除错师点了点头。
The red-haired Corrector nodded.

是的，并非每道题目都需要答案。
Of course, not every question needed an answer.

现在她们都有自己要做的事。
Now they all had their own tasks.

TO BE CONTINUED…
TO BE CONTINUED...

漂流的答案
Answer in a Bottle COL-306604

漂流的答案
Answer in a Bottle

37：怎么样，每个步骤都记下来了，对吧？
Thirty-seven: How's it going? You've followed all the steps in order, right?

教众 II：是的，我把它们按顺序编上号，做了记录。
Believer II: Yes, I've numbered them and made notes.

37：太好了，这是很重要的材料！
Thirty-seven: Wonderful, that will be a most valuable resource!

37：现在要准备的是第二题……
Thirty-seven: Now on to the second question ...

素色袍子们井然有序地进行着游戏。
The women in plain robes continued with the game, methodically going through its motions.

一个属于孩童们的，最简单的小游戏。
It was nothing more than a simple game for kids.

在除错师看来，这多少有些滑稽——这些头脑本该属于更杰出的难题，可他们现在却一丝不苟地在沙滩上做问答。
To the Corrector, it all seemed amusing—here they were brilliant minds meticulously recreating child's play on the beach, instead of tackling the great questions of their age.

苏菲亚：……您觉得这个游戏真的有深意吗?
Sophia: ... Do you really think this game holds any significance?

听到苏菲亚的话，正在做着记录的女性转头对她微笑。
As soon as Sophia asked this, the woman recording the answers turned and gave her a smile.

教众 II：哎呀，您感到无聊了吗?
Believer II: Feeling bored?

苏菲亚：……不，不是的。
Sophia: ... No, not really.

苏菲亚：37 认为，只要完成了这个游戏，就能明白答案构成的数列意味着什么……
Sophia: 37 believes that by completing this game, she'll understand some hidden meaning in the sequence formed by the answers ...

苏菲亚：但我知道父亲，他是个务实、公正的人，从来看重眼前实在的事务。他和我一样，对抽象的东西缺乏感知。
Sophia: But my father was pragmatic, and always focused on the present. Like me, he didn't have an eye for these sorts of abstract things.

苏菲亚：我想他的笔记中并不会有 37 历来寻找的超验的意义。
Sophia: I doubt his notebook could contain any of the transcendental meanings 37 is seeking.

教众 II：嗯……说实话，如果仅从表面看，这些题目的确一眼就能读到结果。
Believer II: Hmm ... Honestly, at first glance, you can easily see the results.

教众 II：每道题目的答案能组成一个十位数，6333434533。
Believer II: The answers to each question form a ten-digit number, 6333434533.

教众 II：我看不出它的价值，但 37 这样做一定有道理。
Believer II: I can't see its value, but 37 must be doing this for a reason.

教众 II：毕竟，她总是能率先洞悉我们所不能及的“本质”。
Believer II: After all, she's always the first to grasp the "essence" beyond our understanding.

苏菲亚：……本质……
Sophia: Essence ...

在那之前，她从未把父亲的笔记本和这个词联想起来。
She had never associated her father's notebook with the notion of some transcendental essence.

一本儿童的习题集，能有什么抽象的、超验的“本质”呢?
What "essence" could a set of children's exercises in an old book possibly hold?

苏菲亚：如果这只是白白浪费时间，或者消磨大家的信任……
Sophia: If this is just a waste of time it could erode everyone's trust ...

苏菲亚：那我……
Sophia: Then I ...

除错师不安地蹙紧眉头。
The Corrector furrowed her brow with worry.

她有义务纠正眼前的错误。
She felt as if she had to rectify this mistake.

37：苏菲亚，你在想什么?
Thirty-seven: Sophia, what's on your mind?

好友好奇的脸突然出现在眼前，让她猝不及防地后退了半步。
Her friend's sudden appearance caught her off guard, forcing her to take a step back.

苏菲亚：……没什么。
Sophia: ... Oh—nothing.

她迅速调整好了神态，将一点儿慌乱掩藏起来。
She forced an adjustment of her demeanor, hiding any sign of her flustered thoughts.

苏菲亚：我只是在思考，37。这个游戏对于大家来说，会不会过于简单?
Sophia: I was just thinking, 37. Are these game perhaps too simple for the others?

37：是吗?
Thirty-seven: Are they?

37 歪了歪头，很自然地发表了不解。
37 tilted her head.

37：可是数字没有优劣之分，问题的答案也同样!
Thirty-seven: But there is nothing simple about any set of numbers, nor any set of answers!

37：最简单的数字里往往蕴含着最深刻的道理，这就是为何“1”是单子，是一切思想的起源。
Thirty-seven: Indeed the simplest numbers often hold the deepest meaning. Even a number as singular as"1", holds the origin of all mathematical thought.

37：这个笔记本里的问题也一样，我是这么想的!
Thirty-seven: I believe the problems in this notebook are no different!

苏菲亚：……当然，你总是正确的，37。
Sophia: ... Of course, you're always right, 37.

苏菲亚：但是比起这么简单的游戏，也许我们还有——
Sophia: But perhaps instead of these simple games, we could—

37：还有更重要的事?
Thirty-seven: Work on more important things?

对话的下半句被 37 全然说中，这使红发的除错师再次陷入了短暂的慌张。
37 finished her sentence, catching the red-headed Corrector off guard once again.

37 的目光紧追不放，她向前迈出一步，连珠炮般提出自己的疑问。
37's eyes followed her as she took a step forward and fired off a series of questions of her own.

37：苏菲亚总是把这几个字挂在嘴上。
Thirty-seven: Sophia, you keep repeating yourself.

37：——那对苏菲亚来说，最重要的事是什么?
Thirty-seven: —So then, what's most important to you?

苏菲亚：……!
Sophia: ... !

回答理应有很多——关于“流溢”的研究，关于学派的公共事务，关于这座小岛的命运。
There could be many answers—their research on the "Emanation", the school's public affairs, or perhaps even just the fate of this small island.

可是——
But—

苏菲亚：不，走开，37!
Sophia: No, go away, 37!

苏菲亚：我知道你是对的，你总是对的。但我不想知道!
Sophia: I know you're right, you're always right. But I don't want to know!

苏菲亚：我已经不想知道我的数字了——！
Sophia: I don't want to know my number anymore—

水面被玻璃瓶撞破，响动听起来沉闷而苦涩。
The glass bottle shattered the water's surface, the splash rang heavy and bitter.

苏菲亚：……
Sophia: ...

苏菲亚：……对不起……
Sophia: I'm sorry ...

她们都记得那句古老的教导，“认识你自己”。
They both knew the ancient instruction, "Know thyself."

但最重要的答案早已被海浪卷走，陷入漫长无止境的漂流。
But the most important answer had already been swept away by the waves, lost in the endless depths of the sea.

苏菲亚：……
Sophia: ...

苏菲亚：……抱歉，37，我想我暂时没办法回答你。
Sophia: ... Sorry, 37 ... I don't know that I can answer you right now.

苏菲亚：这是个深刻的问题，现在的我无法这么轻易就给出答案。
Sophia: It's such a profound question, and I don't have an easy answer ...

苏菲亚：也许得等我回去后花些时间，好好想想，才能告诉你。
Sophia: I suppose I need some time to think about it properly.

苏菲亚：那么，37，我还要核对物资清单。希望你的研究顺利——
Sophia: —I need to check our inventory. I hope your research goes well, 37—

她平静且快速地说完了这段辞令。
She spoke the words quickly feigning calm.

但想要转身离去并不容易，37 径直抓住了苏菲亚的手。
But it wasn't so easy to turn and leave; 37 held Sophia's hand firmly.

37：曾有人教过我解题技巧——在实在没有思路的时候，就应该试着转换心情。
Thirty-seven: Someone once taught me a problem-solving technique—when you're at a loss, try changing your mood.

37：这招很有用，我检验过许多次。
Thirty-seven: It's a useful trick. One which I've tested many times.

37：既然苏菲亚还没有更重要的事要做，那就来和我们一起玩这个游戏吧！
Thirty-seven: If you don't have anything more important to do now, why not play the game with us?

37：你还没有自己参与过呢，休的游戏！
Thirty-seven: You still haven't participated in Hugh's game yet!

苏菲亚：……
Sophia: ...

要甩开这只手总是很艰难的。
It was always so impossible to let go of that hand.

苏菲亚：好吧……但我记得你承诺过，要在晚餐前结束。
Sophia: Alright ... But remember, you promised to finish before dinner.

37: 当然！反正 6 也还在环岛散步，在他数到四位数前，我们有的是时间！
Thirty-seven: Of course! Anyway, 6 is still walking around the island. We have time before he reaches four digits!

37: 来吧，苏菲亚，接下来是这道题——
Thirty-seven: Come on, Sophia, let's tackle the next question—

谜题深处
Behind the Puzzle COL-306605

37: 这些游戏对你有帮助吗，苏菲亚?
Thirty-seven: Sophia, was the game helpful at all?

苏菲亚刚刚从游戏场上下来，37 便迫不及待地凑了过来。
37 rushed over as Sophia descended from the "playground".

37: 它们是否有趣？是充满灵感的，还是乏味干瘪的?
Thirty-seven: Were the problems fun, inspiring, or perhaps dull?

37: 是应该被记录的，还是该被弃置在实验室角落的?
Thirty-seven: Should the results be logged or just discarded in a corner of the lab?

苏菲亚: 唔，我承认它们并没有我想的那么无聊，把推演过程表示出来也很易懂……
Sophia: Well, they weren't as dull as I expected. Breaking down the logic was pretty straightforward ...

苏菲亚: 对于一个刚刚来到小岛的孩子而言，这是很好的游戏。
Sophia: For a kid just arriving on the island, it's a decent puzzle.

苏菲亚: 如果我在小时候就玩到它，也许我会更喜欢数学——更早地领略到“万物皆数”。
Sophia: If I'd played these as a kid, I might have warmed up to math more—perhaps I'd even have understood the whole "everything is numbers" thing a little sooner.

苏菲亚: 但对于现在的我来说，它派不上什么用场，也谈不上什么启发。
Sophia: But in the here and now, they don't feel very practical, nor enlightening.

37: 唔……是这样啊。
Thirty-seven: Oh ... I see.

37: 我们已经体验过了……可还是没有任何所得，究竟是哪里不对呢?
Thirty-seven: No luck, it seems. What could we be missing?

笔记本在 37 的手中被失望地来回翻动，她似乎又陷入了思考。
With obvious disappointment, 37 flipped through the notebook once more, diving deep into her thoughts again.

天已经黑了，人们也三三两两地离开了沙滩。
It was getting dark, and the others began leaving the beach.

但 37 的游戏仍未有所收获。
It seemed 37's games didn't yield any results.

对她的助手而言，这或许才是合乎情理的结果——这个游戏除了简单的启蒙和教学，并没有什么深刻的“寓意”。
For her assistant, this seemed like the expected outcome—these games appeared to be more of a basic educational tool than something profound.

37: 唔唔唔——
Thirty-seven: Hmmm—

苏菲亚：去吃晚餐吧，向 6 申请的沙滩使用时间已经结束了。
Sophia: It's time for dinner, we've run out of the time we requested from 6—there's ...

37：不，再等等……！只要我不去吃晚餐，就还没有结束……
Thirty-seven: No, wait ... ! It's not over until I go for dinner ...

37 念念不舍地看着沙滩上的格子线，好像脚在上面生根了一样。
37 stared at the grid lines on the beach, as if she was rooted there.

这些数字的谜题一定会整夜整夜地在她脑子里盘旋，取代掉所有的烤兔肉和蜂蜜面包片。
The puzzle represented by these numbers would be on her mind all night, replacing thoughts of roasted rabbit and honeyed bread.

即使谁都能看出来这组数列并没有什么“深意”——但万一那是人们看得还不够深呢?
Although it was clear that this number sequence didn't hold any profound meaning at first glance, what if everyone just hadn't looked deep enough?

苏菲亚：……
Sophia: ...

苏菲亚：……明天早上我还有空闲，也许我们可以那时候来做尝试。
Sophia: ... I have some free time tomorrow morning. Maybe we can give it another shot then.

苏菲亚：从阿波罗星初升的清晨开始，也许能有新的思绪。
Sophia: When Apollo first rides out chasing the dawn, we might discover a fresh perspective.

37：……?！真的吗?!
Thirty-seven: ... ?! Do you think so?!

苏菲亚：不然你应该会在这里待一整晚吧?
Sophia: Otherwise, you'd stay here all night?

苏菲亚叹了口气，被迫面对自己又一次纵容了 37 的事实。
Sophia sighed, once again realizing she was indulging 37.

苏菲亚：我不明白，37。你为什么断定这组答案构成的数列里会有尚未解明的深意呢?
Sophia: I don't understand, 37. Why are you so convinced there's some hidden significance in this sequence of answers?

37：嗯？因为它就在那里啊！
Thirty-seven: Huh? Because it's right there!

37：虽然很模糊，但我感受到了，休在写下这些数字时，带着强烈的感情……
Thirty-seven: I feel it, if only vaguely. When Hugh jotted down these numbers, they contained a strong emotion ...

苏菲亚：……所以，你依靠的是直觉吗?
Sophia: ... So, you're going with your intuition?

苏菲亚：直觉……
Sophia: Intuition ...

谈到这个词时，女孩脸上的表情黯淡了下去。
At the mention of that word, the girl's expression dimmed.

在岛外，在她曾被称为“神秘学家”的童年时刻，她对这个词并不陌生。
Back in her childhood before she came to the island, when she was known as an "arcanist", she was familiar with this term.

感受，聆听，洞悉，祈求，全身心专注，捕捉那灵感的一闪。这些她很熟悉。
Sensing, listening, understanding, beseeching, being fiercely focused, and seizing inspiration. It was all familiar to her.

但她也并不能随时随地直接看到灵光，并像扑捉指间蝴蝶一样和它们嬉戏。
But she couldn't see the flash of genius whenever she pleased, playing around with them as if she was catching butterflies.

这样的能力……究竟又意味着什么呢?
What did having such an ability really mean?

37：苏菲亚——快跟上来！
Thirty-seven: Sophia—come on!

37：再不去食堂的话，就只能喝锅底的底料汤了！
Thirty-seven: If you don't get to the canteen now, only the soup base will be left!

37 已经动作灵活地跃过面前的一排海鸥脚印，在前方回身向苏菲亚招手。
37 had maneuvered nimbly over a line of seagull footprints, and waved to beckon Sophia ahead.

苏菲亚：……
Sophia: ...

苏菲亚：等等我，马上来！
Sophia: Ho ... Hold on, I'm coming!

是的，不要忘记，并非每道题目都需要答案。
And remember, not every question needs an answer.

现在还有更需要做的事。
We have more important things to do now.

TO BE CONTINUED…
TO BE CONTINUED...

言辞之外
What Was Not Expressed COL-306606

言辞之外
What Was Not Expressed

清晨的沙滩本该是最适合独自放松，散步的场所。
Mornings on the beach were meant for quiet strolls and relaxation.

提早到达，再花些时间理清思绪，苏菲亚的计划做得不错。
Sophia's plan to arrive early and clear her mind seemed wise,

但事情常常无法如人所料。
but things rarely went as expected here.

37：苏菲亚，你到得比我晚！
Thirty-seven: Sophia, you're late!

37：瞧，我今天在阿波罗星初升时就来海滩边上了！
Thirty-seven: I've been here since Apollo rose to meet the dawn!

围绕着 37 的人群似乎比昨天还要多，她蹦跳着朝苏菲亚招手。
The crowd surrounding 37 seemed even larger than yesterday as she hopped and waved at Sophia.

处在人群中心的还有另一个熟悉的身影。
At the center of the crowd was another familiar figure.

210：噢，我们的除错师也来了？看来这的确是一个完美的时机。
210: Ah, good, the Corrector's here too? What perfect timing.

210：兄弟们，姐妹们，到这儿来，瞧瞧这回事。
210: Hey everyone, come gather around and take a look.

210 手里高举着一本杂志。
210 was holding up a magazine.

210：——我的文章可绝不会比她在这里玩的游戏更幼稚，更浪费时间！
210: —My submission isn't any more childish than this game she's playing!

一些人们发出了笑声——岛上的人们早已习惯了这种针锋相对。
Some chuckled—it was a common occurrence for the islanders familiar with their banter.

210 自信地在苏菲亚与 37 面前摊开一本杂志。
210 confidently presented the magazine to Sophia and 37.

杂志折起的页角已经皱得不成样子。一篇数学证明被淹没在花边新闻与各种启事之间，蜷缩在版面角落。
The magazine pages were a mess. Amid frivolous news and various announcements, a crumpled mathematical proof huddled in a corner.

好在文章的作者仍有地方署名。
Fortunately, the author was still identifiable.

苏菲亚：“《试论真理的语言结构》”……210，这是你的签名？
Sophia: "A Treatise on the Linguistic Structure of Truth"—210, is that your name?

高大的辩论家不置可否地摊开手。
The towering Theorist just spread his hands out in an over-proud twist without confirming.

210：诚然，在“流溢”后，我们就切断了和外界的联络，被动地成为一座孤岛……但总需要有人迈开创新的步伐。
210: Certainly it was no easy feat given our island's isolation, to get this published ... But where there is a will there is a way.

210：向岛外的数学杂志投稿，重新建立我们对外的联系，只是我个人诸多创举中的第一步。
210: Submitting these mathematical essays to outside publications is just the beginning of my many accomplishments to come.

教众 I：可我们本来就是一座孤岛？
Believer I: I think he's over-blowing the difficulty of reaching out.

苏菲亚：……这好像也并不是数学论文？
Sophia: And is this really a mathematical treatise ... seems like a lot of words.

苏菲亚将杂志翻过来，很确定这是一本常见的铁道周刊。
Sophia flipped through the magazine quickly, it was nothing more than a common railway journal.

而 210 的论文赫然位列“逸闻摘抄”栏目。
210's essay was listed in the "Excerpts and Anecdotes" column.

苏菲亚：竟然在这种杂志上发表了关于真理的论文，唔……编辑推荐理由是，“虽然内容晦涩不明，但言辞堪称优美，可供诸位读者摘抄。”
Sophia: To publish a paper on truth in a magazine like this ... Huh ... The editor's comment is, "Although the content is obscure, the wording is elegant and worth citing."

苏菲亚：还挺厉害的……
Sophia: That's impressive, nonetheless.

这句夸赞的确出自真心实意，辩论家的气势也愈发嚣张。
The compliment was genuine, and the already haughty Theorist's confidence grew even more.

唯独 37 不服气地抱起双臂。
37 though crossed her arms in a breathless huff.

37：我也看了那篇文章，完全是漏洞百出的误导。你的命题就是错误的！
Thirty-seven: I've read that article. It's pure sophistry! Your premise is flawed and the central thesis over-complicated!

37：真理的美在于简明，过多的修饰只会造成曲解。
Thirty-seven: The beauty of mathematical truth lies in its simplicity. These nonsensical embellishments only lead to misinterpretation!

37：它太繁琐，修饰过多，缺少最为重要的推论过程。
Thirty-seven: It's cumbersome, frivolous, and most importantly, it lacks good process.

37：正确的推演比任何巧妙的言辞都更有说服力，但在你的文章里却被简单带过不提。
Thirty-seven: This is all just clever rhetoric, lacking in any substance!

37：大部分篇幅都浪费在了无意义的夸赞上。
Thirty-seven: Wasted space and meaningless platitudes.

210：是吗？我并不认为它比小孩子的玩闹更缺乏意义。
210: Is that so? More meaningless than all this child's play.

210：还是说，你所指的简明就是这种游戏，简单的推理和加减法更接近你的真理？
210: Or perhaps this game is simple enough for you? Are these piddling lessons in basic reasoning and arithmetic the truth you are looking for?

210：那我倒能明白了，你就继续玩耍吧。
210: Well, that makes sense for a child. Carry on with your fun and games then.

在旁等待的孩子们簇拥到他的身边，形成一团热闹喧哗的云。
The children on the beach had eagerly gathered around 210, forming a lively crowd.

在好奇心颇重的年纪，他们总是对各种精巧的讽刺与辩论饶有兴致。
At an age when curiosity reigns, they were always interested in this kind of biting debate.

而争论与冲突，高谈阔论与雄心壮志，恰好汇聚于同一个数字。
The arguments, conflicts, grandeur, and aspirations converged on a single number.

37：210。
Thirty-seven: 210.

37：你的数字里明明有 2，3，5，7。
Thirty-seven: Your numbers clearly contain 2, 3, 5, and 7.

37：而你只是把它们一股脑搅在一起，没有加以善用。
Thirty-seven: You've just lumped them together without using them effectively.

210：哦，这是在指责我既无热诚，也不在意秩序，还时常随口发表意见以彰显自己的智慧。
210: Oh, so now you're accusing me of being insincere? That I'm making frivolous gestures only to flaunt my intelligence.

210：——真不错。
210: —How very logical of you ...

210：但正因如此，我能坦率地说出其他人心底埋藏的话。
210: But all this debate allows me to speak the truth that the other's are concealing from you.

210：你的游戏实在是太简单了，37。
210: These are games for children, 37.

210：这样执着于小孩子的简单算术，究竟能获得什么真理的启示?
210: There are no revelations to be gleaned from your stubbornly pursuing some childish arithmetic?

210：诚然，我们信任赫尔墨斯之星的光辉，甘心在你的指引下当一颗伴星。可你也得多考虑些他人的感受，嗯?
210: Oh but we all trust the brilliance of our Star of Hermes and oh-so willingly serve as a companion star under your guidance. But, surely our brilliant star should consider others' duties and responsibilities, no?

37：……
Thirty-seven: ...

苏菲亚及时开口，打破了僵硬的氛围。
Sophia stepped in, breaking the tension at just the right moment.

苏菲亚：这并不是那么严肃的事，210，我们只是消磨餐前散步的时光，37 也没有强迫其他人参与。
Sophia: Don't be so serious, 210. We're just passing the time before breakfast with some games, and 37 isn't forcing anyone else to join in.

苏菲亚：但我也同意这个游戏太过简单。那以你来看，它还需要什么改动呢?
Sophia: But I agree, perhaps these games are too simple. In your opinion, what changes would it need?

210：当然是把题目变得更难，更具备挑战性，还要加入计分和排名环节，并引入淘汰和复活机制。
210: Obviously, the questions should be harder, more fitting our caliber, and there should be scores and rankings, and some sort of elimination and revival mechanism.

210：把所有参与者在沙滩上分组，以三人为一单位进行竞赛。还要准备专门的场地和特定的时段——
210: All the participants should be grouped on the beach, competing in groups of three, and special areas and specific time slots should be scheduled—

37：什么？什么？不!
Thirty-seven: What? Absolutely not!

37 言辞激烈地打断了 210 的滔滔不绝。
37 forcefully interrupted 210's excited rule making.

37：这些游戏和题目是休留下来的！它很简单，因为休就是为孩子们设计的!
Thirty-seven: This game and its questions were left behind by Hugh for a reason! It's simple because it was designed for children!

37：我也不想和任何人竞争，只是想明白休留下的答案数列里隐藏的含义!
Thirty-seven: I don't want to compete with anyone; I just want to understand the hidden meanings within the sequence of answers Hugh left!

37：我知道，如果它变得复杂，能让参与者体会运用智力的乐趣……
Thirty-seven: Of course, if it were more complex, then the participants might enjoy the thrill of its intellectual pursuit ...

37：但事物的美妙正在于它的简单，就像数字。
Thirty-seven: But the beauty of the game lies in its simplicity, just like numbers themselves.

37：去掉所有的修饰，“1”仍然是“1”。
Thirty-seven: Stripped of all embellishments, "1" is "1".

37：一个人，一块石头，一棵树，现象的物质都会腐朽、衰败、更迭，但“1”会一直存在。
Thirty-seven: People, stones, trees, and physical things decay, deteriorate, and change, but "1" remains.

37: 这是很简单的游戏，也足以蕴含最美妙的智慧。
Thirty-seven: This is a simple game, yet it holds the most wonderful wisdom.

37: 不必使简单的事变得复杂。花哨的外表能博得一时的关注，但它也偏离了重要的本质。
Thirty-seven: There's no need to make the simple so complicated. All these facades may grab attention, but it strays from the game's true essence.

210: 那又如何？你也承认，它的确单调又枯燥。
210: So you yourself admit it's dull and monotonous.

210: 我只是把话讲得更使人信服，并没有曲解任何既定的道理。
210: I simply articulated the same meaning with words to made them more convincing, without distorting the truth.

有几位旁听的教众微微点头。
Some of his followers in the crowd nodded as they listened.

他们并不认为这段辩驳很无趣。
They were captivated by his rebuttal.

在学派中最为随处可见的就是分析与讨论，以及无穷无尽的数字。
Such analysis, discussions, and endless numbers was an every day occurrence in this school of thought.

而 37 做出的回应是在沙滩上画出几道方格。
37's response was to draw several squares on the beach.

37: 我从苏菲亚那儿听说了这个。
Thirty-seven: I learned about this from Sophia.

37: “跳房子”，在岛外它是很受欢迎的儿童游戏。
Thirty-seven: "Hopscotch" is a popular children's game elsewhere.

37: 规则很简单，从根本上来说，只是从这头跳到那一头。我学得很快，也一直记得。
Thirty-seven: The rules are simple; one hops from one end to the other. It was easy enough to learn, and I've never forgotten it.

210: 这不意外，有什么是你学不会的呢?
210: So our star has learned hopscotch? I hope you weren't expecting surprise ...

37: 不，我想说正因为简单，所以它很容易理解。
Thirty-seven: No, I mean, it's easy to play because of its simplicity.

37: 所以它能从苏菲亚曾经在的地方传到岛上，而且还有孩子在玩。
Thirty-seven: For this reason, it spread from where Sophia was before, and now the children on our island play it too.

昨天在海滩上玩耍的那群孩子笑起来。
The group of children who played on the beach yesterday began to laugh.

教众小孩 I: 没错!
Child Believer I: That’s right!

教众小孩 II: 37 带我们玩的游戏也很有意思。
Child Believer II: 37's game is fun too.

向小支持者们打了个招呼，37 继续说下去。
37 acknowledged her young supporters and carried on.

37: 让休设计的游戏变得复杂，不就失去了它最重要的特质吗?
Thirty-seven: If we complicate the game Hugh that designed with new rules and competition, won't we lose its true essence?

真是场精彩的辩驳，几位教众已经开始用海贝打赌哪一方会获胜。
It was a splendid debate, and some followers had already started betting seashells on which side would win.

在岛上，这样的辩论也许会从清晨一直持续到教典规定的缄默时间。
On the island, such debates might continue from early morning until the time of silence.

那样的话 37 的游戏就将无从继续，更重要的研究也只能悲惨地持续搁置。
If that were to happen, 37's game would be unable to continue, and more important research would tragically remain on hold.

除错师感到自己有义务来纠正局面。
The Corrector felt the need to intervene.

苏菲亚：你们双方都提交了有力的论点。我认为——
Sophia: Both sides brought strong points. I believe—

210：你说得对。
210: You're right.

苏菲亚：是的，37 说得对——什么？
Sophia: Yes, of course, 37 is right—about what, exactly?

210：正如你所言，这是个儿童游戏，本质不会改变。那样我倒是十分好奇，你能在这样的“简单”中获得什么启示。
210: As you said, it's a children's game; its essence cannot and will not change. I'm curious, though, about what insights you can glean from such "simplicity".

210：谁都能一眼看出的答案，你却认为这些数字的组合有什么“深意”——
210: Everyone can see the answers at a glance, yet you believe there's some "profound meaning" in this combination of answers—

210 讥讽地摊开手，耸了耸肩膀。
210 spread his hands in a mocking gesture and shrugged.

210：不过是花些时间而已，当然比不上我们伟大的赫尔墨斯之星将做的证明重要。
210: It's just time wasted, nothing compared to the pivotal proof uncovered by our great Star of Hermes.

210：继续吧，弄清楚这个儿童游戏到底有多值得在乎。
210: Go on, figure out how much this children's game is worth caring about.

210：我已经迫不及待地想看看结局了。
210: I'm eager to see the outcome.

纯粹的数
Just Numbers COL-306607

纯粹的数
Just Numbers

眼前的光景似乎与过去别无二致。
The sight in front of them seemed much like it always did.

海边的风总是带着咸味，裹挟着砂砾涌来。
The salty breeze and the grains of sand carried by it.

两个身影一前一后，靠牵起的手紧紧连缀着。
Two figures strolled hand in hand.

没有人在意从传道会溜走的孩童。只要足够小心，不被抓住。
No one cared about the children sneaking away from the congregation. They just had to be careful to avoid getting caught.

苏菲亚： 好啦，这个地方就不错，比我家以前的院子大多了！
Sophia: Wow, this place is so beautiful and wide. It's much bigger than my yard back home!

苏菲亚： 你玩过跳房子吗?
Sophia: Have you ever played hopscotch?

顺着手指望去，沙地上有几道用贝壳划出的线条。
Sophia pointed towards several lines drawn in the sand with shells.

它们组成了稚拙但规整的方格。
Together, the lines formed clumsy squares.

苏菲亚： 从这儿跳到——这儿，千万不要踩到边界线，也不要让贝壳压到线。
Sophia: Jump from here to there, but don't step on the lines or squash the shells.

苏菲亚： 我在岛外面总玩这个。它和捉迷藏之类的不同，即使只有你一个，也能玩下去……
Sophia: I used to play this game before I came to the island. It's different from hide-and-seek; you can play it alone too ...

37： 听上去真的很不错。
Thirty-seven: That sounds fun!

37： 不过，地面的线条毫无规律，只是被随便摆放在这里。
Thirty-seven: But I can't understand the meaning of the lines ... They don't form a pattern I can recognize.

37： 或许我得再玩一会儿才能明白它的意义。
Thirty-seven: Maybe I need more time to understand their meaning.

一小捧砂砾被踢了起来。37 愉快地挪动脚步，转了个圈。
37 playfully kicked up some sand, twirling around.

37： 为什么我们只能跳方形的格子?
Thirty-seven: Why do we only jump on the squares?

37： 把九点圆放进这个游戏里应该也很棒！
Thirty-seven: Adding a nine-point circle to this game would be nice!

37： 有四个内切圆、十二个旁切圆会与它相切，如果只在切点上跳跃……
Thirty-seven: Four inscribed circles, twelve tangential circles—it'd be amazing if you only jumped from the points ...

她把自己想到的东西都摆出来与朋友分享。
She shared her thoughts, trying to convey what she saw in her mind's eye.

认真，执着，试图在讨论与交流中说明她所见的事物。
Her tone grew earnest and persistent, trying to illustrate the things she imagined.

就像在沙滩上捡拾细碎闪亮的砾石。
Yet, it was like endlessly picking up shiny pebbles on the beach ...

一如今日。
... just like today.

37： 你总是把简单的东西变复杂，210。休只是让我们完成这些游戏——
Thirty-seven: 210 always tries to make simple things complicated. Hugh just wanted us to finish the game's problems—

37：什么？我当然知道教典说：“不把问题分为三个方面的人无法做到真正的明智。”
Thirty-seven: Well? Of course, the scripture say: "One who does not divide the problem into three parts cannot achieve true wisdom."

37：可这不足以成为你要推进三人一组的竞技比赛的论据！
Thirty-seven: But that's no reason to propose three-player matches!

记忆中的身影与眼前的光景重合，似乎时日未曾流逝。
The present scene intertwined seamlessly with past memories, unaffected by time.

苏菲亚：哈哈。
Sophia: Ha-ha!

女孩少见的笑容让同伴好奇地凑了过来。
The girl's rare smile piqued her companion's curiosity and she came over.

37：苏菲亚，你在想什么？
Thirty-seven: Sophia, what's on your mind?

37：是一些让你开心的事儿吗？
Thirty-seven: What's made you so happy?

苏菲亚：我在想，“流溢”发生后，大家好像很少像这样聚在一起。
Sophia: I was thinking, since the "Emanation", we've hardly ever gathered together like this.

苏菲亚：6 成为了 6，你也接手了母亲的研究，210 忙着他自己的交际与证明。
Sophia: 6 became 6, you've taken over your mother's research, and 210 is always so busy with his proofs and fraternizing.

苏菲亚：连刚才那样的讨论几乎都不再发生。
Sophia: Even discussions like the one we just had happen so rarely now.

苏菲亚：但时隔这么久，你也还是如此坚定。
Sophia: Yet after all this time, you remain so resolute.

苏菲亚：好像从不曾变化。
Sophia: It's like you never changed.

37：唔？也许你没有注意到，但我确实改变了。
Thirty-seven: Hmph! Maybe you haven't noticed, but I have changed.

高高举起手，37 比划着从地面到头顶的距离。
Raising her hand high, 37 gestured from the ground to her head.

37：和过去相比，我长高了不少。
Thirty-seven: I've grown taller than before.

37：我的头发也更长，更难打理了。
Thirty-seven: And my hair's longer and harder to manage now.

37：你帮我梳头的时间也变久了。
Thirty-seven: It takes much longer for you to comb it.

苏菲亚：不是这些看得到的改变……
Sophia: Not these surface-level changes, 37 ...

37：好吧，我不太明白。
Thirty-seven: Oh, then I’m not quite sure what you mean.

37：比起这个——我需要你的帮助，苏菲亚！
Thirty-seven: Never mind that—I need your help, Sophia!

37：只剩最后两道题了，我们离答案仅差一粒小石子的距离。
Thirty-seven: We're down to the last two questions, just a stone's throw from the answer.

37：我希望和你一块儿完成它。
Thirty-seven: I was hoping we could finish it together.

纯粹的数
Just Numbers COL-306608

37 合上笔记本，她确信自己已经体验了其中每一个细节。
Closing her notebook, 37 felt every detail course through her body.

而结果是显明的，从一开始，大家就可以在纸面上看出这些数字。
The result was clear; from the beginning, everyone could see the number laid bare on the paper.

37：6333434533。
Thirty-seven: 6333434533.

一个能被 41 整除的合数，其最大的质因数是 154474013。
A composite number divisible by 41, its largest prime factor was 154474013.

如果把它视作数列，那这是一个仅由 3、4、5、6 构成的简单组合。3 出现了 6 次，4 出现了 2 次，5 和 6 各出现了 1 次。
If you saw it as a sequence, it was a simple combination of 3, 4, 5, and 6. 3 appeared 6 times, 4 appeared twice, while 5 and 6 appeared once each.

37：可无论是作为数，还是数列，我都感觉自己少看了一些东西……
Thirty-seven: Whether you look at it as a number or a sequence, it still feels like something is missing ...

37：休标注的几个图形一定有用处。
Thirty-seven: Hugh's annotated shapes must hold the key.

37：我只是暂时没有想到这些小点指的是什么。
Thirty-seven: I just haven't figured out what those little points mean yet.

37 指向笔记本上的一滴墨痕。它不偏不倚地落在六边形的正下方。
37 pointed to an ink blotch on the notebook directly under a hexagon.

210：也许只是无意弄上去的痕迹。
210: It's just an accidental smear.

37：但靠后的这道题下边也有，瞧。
Thirty-seven: But look, there's the same mark below this question later on too.

210：我知道有时候为了方便，他们会给无限循环小数里头不断重复的数字打上点。
210: Sometimes, for convenience, they put a dot over repeating decimals in infinite series.

210：那个点在上，这个点却标在下方——也许苏菲亚的父亲认为 6 其实相当具有局限性？
210: That dot's above, but this one's below—perhaps Sophia's father thought 6 had its limitations?

37：这段话毫无道理，不是这样的。
Thirty-seven: That makes no sense, it can't be.

210：知道幽默感为何物对你也没什么坏处。
210: Having a sense of humor every now and then wouldn't hurt.

他耸了耸肩，对 37 的反驳不甚在意。
He shrugged, pretending indifference to 37's rebuttal.

37：我承认，起初我把休的标记想得太过复杂。
Thirty-seven: I admit I overcomplicated Hugh's marks at first.

37：毕竟它们的特性太多，很容易扰乱思考方向……
Thirty-seven: There are so many possible attributes that they easily steered my thinking in the wrong direction ...

210：听听你之前对我的指教：不必使简单的东西复杂。
210: Remember what you said to me earlier: "Don't complicate simple things."

210：也许这些符号里什么深意都没有——只是你使它复杂化了。
210: Maybe there's no deep meaning in these symbols—maybe you've just made it complex.

37：不，绝对不会，我很确定！休一定不是随便做这些标记的。
Thirty-seven: No, absolutely not! Hugh didn't leave these marks at random.

37：你瞧，只有答案是数字 3 的题目边上画着这种图案。
Thirty-seven: Look, only the questions whose answer is the number 3 have this kind of pattern.

37：这不过是和三角形个数有关的小谜题。
Thirty-seven: It's a small puzzle related to the number of triangles.

苏菲亚：父亲的确很喜欢各种几何形状，我认为 37 的想法有道理。
Sophia: My father did love geometric shapes. I think 37 might be onto something.

获得支持的 37 得意地继续说下去。
Feeling supported, 37 confidently continued.

37：我本以为，如果我实际体验了这个游戏，就能明白这些标记和数列的含义……
Thirty-seven: I thought if I experienced the game firsthand, I'd understand the meaning behind these marks and sequences ...

37：但现在我还是不明白。
Thirty-seven: But I still don't get it.

37：一定是哪里缺失了一环，因为我并不了解休。如果是苏菲亚来的话……
Thirty-seven: There's something missing here, and it's because I don't understand Hugh well enough. If I were Sophia—

210：哦，所以结论是，游戏里并没有你坚持的什么秘密。
210: Oh, so the conclusion is there's no secret to this game after all?

210：看来我要赢了。
210: In that case, it looks like I've won.

37：你太着急了，210！
Thirty-seven: Don't be so hasty, 210!

37：教典说过，学神先不语。应当保持沉默，认真听取他人的发言。
Thirty-seven: The scripture say the learned remain silent. They listen attentively and take others' words seriously.

37：我还没说完就被不停地打断！
Thirty-seven: So perhaps you will show yourself to be a proper learned scholar and let me finish without interruption?!

210：教典也说过，要聆听风吹动的声音。
210: The teachings also exhort us to listen to the sound of the wind.

210：积极聆听万物的声音，对你的思考有好处。——难道我不算万物之一吗？
210: They demand that we earnestly listen to everything to expand our thinking—Have you considered that I too am a part of "everything"?

210：想想你的论点——简单的游戏足以蕴含最美妙的智慧。
210: Think about your argument—simple games can hold the most beautiful wisdom.

210：而你现在认为，你寻不得这样的智慧，是因为你不够了解休。
210: Yet now you realize that this wisdom eludes you because you don't understand Hugh well enough.

210：——瞧瞧，37。我甚至懒得踢翻你的城堡，因为它已经是一摊流沙了。
210: Can't you see, 37? I don't even need to knock your castle down; it's already a puddle of quicksand.

210 讥讽地摇了摇头，似乎结论已经不言而喻。
210 sarcastically shook his head implying that the conclusion was self-evident.

37 并不相让，抱起手臂。
Unyielding, 37 crossed her arms.

37：我完全不懂你在说什么！因为你的话空洞无物，只有修辞。
Thirty-seven: More meaningless rhetoric!

210：别着急，我正要解释。
210: Calm down and let me explain.

210：美妙的智慧应该适用于每个人，你现在却要借助私人关系来勘破真相。
210: The beauty of wisdom should apply to everyone, yet you want to uncover truths through personal relationships.

210：是的，也许这个数列确有深意。也许它的深意，不过是休给他女儿的一句家书。毕竟它从来不是什么公理集，只是一个私人笔记本。
210: Maybe this sequence indeed holds meaning, but perhaps it's just a personal note Hugh gave to his daughter. After all, it's not a collection of axioms; it's a personal notebook.

210：——这串数字只会对休和苏菲亚有意义，那你知道又有什么用呢?
210: These numbers might only hold meaning for Hugh and Sophia. But what use do you have for them?

210：教典说：不要轻易向别人伸出右手。这话说的是我们应管好自己的事。
210: The scripture also says: "Do not easily extend your right hand to others." In other words, one should attend to their own affairs.

210：而我们的赫尔墨斯之星则热衷于拿走他人的证明，再把它们随意抛掷。
210: Yet, the Star of Hermes eagerly takes away others' proofs and treats them as her playthings.

210：你的母亲留下的内容还不够你打发时间吗?
210: Aren't the materials left by your mother enough to pass the time?

210 毫不掩饰话语中的讥讽。
210's mockery was evident in his words.

但他的对手也有自己的坚持。
But his opponent remained steadfast.

37：不，这句话的含义是，我们不要轻易将智慧和知识传达给不懂欣赏的人，你歪曲了它的原意！
Thirty-seven: No, the teachings mean that we shouldn't easily impart wisdom and knowledge to those who don't appreciate it. You've twisted its meaning!

37：进入神庙后，不可回头——在追求真理的道路上，一知半解比一无所知更糟糕。
Thirty-seven: Once you enter the temple, you cannot turn back. In the pursuit of truth, insufficient knowledge is worse than total ignorance.

37：既然我已经开始探寻这个问题，就不应中途停下。
Thirty-seven: Since I've begun exploring this, how can I stop halfway?

37：而且，数的意义并不是任何一个人规定的！因为数就只是在那里，与时间、地域以及我们是怎样的人都无关。
Thirty-seven: And the meaning of numbers isn't determined by anyone! They exist, unrelated to time, space, or who we are.

37：它并不是谁的私有物！
Thirty-seven: They're not someone's property!

37：如果我们都未曾得到这串数字，又怎么能断言它的性质呢?
Thirty-seven: If none of us know the sequence, how can we assert its nature?

交谈的天平再次向无止境的辩驳倾斜。
The conversation veered again towards an endless back and forth.

苏菲亚：唔，这下糟了……
Sophia: Oh no ...

除错师有些困恼地夹在二人中间。
The Corrector felt torn, caught between the two.

调停纷争是她的长处，可这更像是有理有据的辩经。
Mediating disputes was her strength, but this seemed despite their emotions, to be a well-reasoned debate.

也许她应该就此离去，留这二人穷尽真理，毕竟这更加符合学派的作风。
Maybe she should leave them to exhaust the truth, it aligned more with their scholarly approach.

就在她思索时，37 猛地转过头来。
As she pondered this, 37 suddenly turned to her.

37：既然这样，我们就交给苏菲亚来裁决吧！
Thirty-seven: In that case, let Sophia be the judge!

37：找出笔记里的秘密，看看究竟我们谁正确。
Thirty-seven: Uncover the secrets in the notebook and see who's right.

210：我同意，让除错师检验问题的对错，让每个人做自己该做的事。
210: I agree, let the Corrector determine the truth!

苏菲亚：……唉，还是这样了吗?
Sophia: ... Oh, so this is how it's going to be?

她无奈地扶着额头，为自己片刻的犹豫有些后悔。
She sighed, regretting her momentary hesitation.

但要拒绝友人期待的目光也并非易事。
It would be too difficult to refuse the expectant gazes of her friends.

苏菲亚：好吧，我会用心判断。
Sophia: Fine, I'll make the judgement.

苏菲亚：首先，让我把这个游戏全部回顾一遍……
Sophia: First, let me go over the game properly ...

Sand and Gold COL-306609

沙粒与黄金
Sand and Gold

苏菲亚：这座岛屿有许多特殊之处。
Sophia: This island holds so many quirks ...

苏菲亚：而 37 在这之中也是格外特殊的一个。
Sophia: ... and 37 possesses the greatest of them all.

苏菲亚：她诞生起就拥有自己的数字，明白自己前行的方向。
Sophia: She was born with her own set of numbers, always clear about where she's headed.

苏菲亚：当她在沙滩上讲述着那些不会消失的数，那些美妙的证明……
Sophia: When she speaks of those never-ending numbers on the beach, those beautiful proofs ...

苏菲亚：——那一瞬近乎永恒。
Sophia: It feels like coming face to face with eternity.

苏菲亚：与此同时，我也深知了自己的黯淡和平凡。
Sophia: At the same time, I deeply understand my own simplicity and ordinariness.

苏菲亚：让群星在应在的地方发光，仰望的人会继续仰望，没有什么不好。
Sophia: There's nothing wrong with letting the stars shine where they should, and those who look up will continue to look up.

苏菲亚：收拾实验室，打理头发，列出物资清单，接待访客……
Sophia: Tidying the lab, managing her hair, listing supplies, receiving guests ...

苏菲亚：不必让这些碎屑分去 37 的注意，她的时间应该留给更伟大的研究。
Sophia: There's no need for these little things to occupy 37's attention. Her time should be spent on more significant research.

苏菲亚：但除去这些，37 是一颗诞生不久、光芒崭亮的星星。
Sophia: But beyond all that, 37 is like a bright star, newly born.

苏菲亚：她不在意常识，会对许多新鲜事物好奇，贪玩又随心所欲。
Sophia: She disregards conventions, is curious about many new things, and has a playful, carefree spirit.

苏菲亚：……就像每一位与我年龄相仿的普通玩伴。
Sophia: ... Just like any other childhood friend.

苏菲亚：37 有她自己能做和要做的事。
Sophia: 37 has her own pursuits ...

苏菲亚：而我也有应当做的事——验证 37 给出的答案。
Sophia: And I have a task to complete—verify the answers 37 gives.

苏菲亚：……
Sophia: ...

她抚摸着父亲留下的笔记本，闭上眼。
She touched her father's notebook, closing her eyes.

她记得许多具象的碎屑。
She remembered many vivid fragments.

在海滩上筛取细沙，打磨镜片时手指破皮的刺痛。
Sifting sands on the beach, the sting of her fingers as she polished his lenses,

肉桂粉与鹰嘴豆的香气中回响的哼唱。
the fragrance of cinnamon and chickpeas lingering in the air.

船只破开水面，驶近岸边，在逐渐衰落的欢呼声中分崩离析。
A ship cleaves through the water's surface, approaching the shore, before disintegrating amid fading cheers.

然后，一切往前。越过翻涌的波涛，回到简陋的街巷之间。
Then, everything moved forward. Beyond the surging waves, back to humble streets.

这是独属于苏菲亚的来自岛外的记忆，甚至要追溯到印象模糊的童年。
Memories from beyond the island that belonged exclusively to Sophia, reaching back to her blurry childhood impressions.

不同于那颗孤悬于天中的明星，她生于具象，也属于这个黯淡的现象世界。
She was different from that lone star, suspended in the sky. She was born to the tangible and belonged to this dim world of phenomena.

她在记忆的糖罐中翻找着，试图找出一枚可供换取硬币的糖果。
She rummaged through her jar of memories, in search of some trinket worthy of trading for a coin.

她是个勤奋，认真的好姑娘。
Indeed, she was a diligent, serious girl.

因此，她在穷举整个罐子的小石块后，找到了那个可口的答案。
And so, after examining every small stone in the jar, she finally found a satiating answer.

苏菲亚：……我知道了。
Sophia: ... I understand now.

苏菲亚：6333434533。
Sophia: 6333434533.

苏菲亚：这并不只是一串数字，也不是数列，不是一段箴言，或者我们尚未了解的新知识……
Sophia: This isn't just a string of numbers, a sequence, a proverb, or some new truth we've yet to comprehend ...

苏菲亚：它是一句简谱。
Sophia: It's a musical score.

37：……简谱……？那是什么？
Thirty-seven: ... A musical score ... ? What's that?

这个新鲜词儿并不在 37 的思考范围内。
The word wasn't within 37's scope of thought.

她惊讶地瞪大眼睛，明明白白地表示出好奇。
She widened her eyes in surprise, showing her curiosity plainly.

苏菲亚：人们常用这种方式标注乐律，这句简谱是一首歌的开头。
Sophia: People often use this method to notate melodies. This musical score is the beginning of a song.

苏菲亚：它在我的家乡很受欢迎，也是父亲最喜欢哼的曲调……
Sophia: It's quite a popular tune in my hometown, one which my father loved to hum ...

苏菲亚：……他的确在这些题目中倾注了许多感情。
Sophia: ... He must have poured his heart into these questions.

沙粒与黄金
Sand and Gold COL-306610

只要想起开头的音节，其后的乐句就自然地从喉咙里涌出。
If she could just recall the initial notes, the subsequent phrases would naturally follow.

起初尚还磕绊、沙哑，但很快歌声变得流畅，在海滩上漾开。
At first stumbling and hoarse, soon the song became fluent, resonating across the quiet beach.

37: 我知道数字可以是音乐，但我怎么没有早点想到——只差一点儿！
Thirty-seven: I knew numbers could be music, but why didn't I think of it earlier—I was so close!

37: 简谱……我从没听说这种记谱法！
Thirty-seven: A musical score ... but I've never heard of this notation method!

37 并没有低落得太久，她很快就振作起来，真心实意地送出称赞。
37 didn't stay low for long; she quickly perked up, genuinely praising her companion's revelation.

37: 这是一支好听的歌儿，你唱得真好，苏菲亚。
Thirty-seven: That's a lovely song; and you sing it well, Sophia.

210: 哦，真是皆大欢喜。
210: I suppose everyone got what they wanted.

210: 你解开了谜，苏菲亚得到了父亲留下的歌。
210: You've solved the puzzle, Sophia uncovered the song her father left behind ...

210: ——我赢了。
210: ... And I won.

37: 为什么?！我最初的设想是正确的，这串数字的确有深意！！
Thirty-seven: Why?! My initial theory was correct; this string of numbers did have a deeper meaning after all!!

210: 但你不认识简谱。
210: But you glossed over the musical score.

210: 正如我所预见的，它从最开始就和你毫不相关。
210: As I foresaw, this had nothing to do with you from the start.

210: 它只是一首父亲留给女儿的、遥远的家乡歌谣，没有深刻的寓意，没有美妙的智慧，也没有超验的真理。
210: It's just a distant hometown ballad that a father left for his daughter, with no profound meaning, no wonderful wisdom, no transcendent truth.

210: 而你只是为了满足自己的好奇心，再次随心所欲地闹了一通。
210: But you just had to whimsically stir things up again to satisfy your curiosity.

210: 令周围的一切都随之倾斜，不管它们是否会被搅乱或打碎——也可能被成就。
210: Everything tilts around you, regardless of whether it gets disturbed, shattered—or at times accomplished.

210: 这就是人们所称的天才。
210: That's the genius the people talk about.

210: 但不必担心，我说的这些都只是无足轻重的琐碎砂砾。而你是赫尔墨斯之星，是漫无尽头的沙滩上埋藏的黄金。
210: But don't worry, my words are just inconsequential grains of sand compared to you, the Star of Hermes, the golden treasures are buried in this endless beach, aren't they?

210：大家愿意陪着你玩耍，毕竟簇拥天才比跟随庸人要好得多。
210: Everyone's willing to play along; after all, flocking to a genius is much more interesting than following an ordinary person.

37：但我用游戏的方式验证了它的正确性……
Thirty-seven: But I played the game and verified it ...

37：我还告诉了苏菲亚笔记本里一定有秘密。
Thirty-seven: And I told Sophia there must be a secret in the notebook.

37：我……
Thirty-seven: I ...

这算得上罕见的场面，37 竟然没有立刻想出如何反驳。
This was a rare moment—37 was at a loss for words.

她沮丧地拧着眉毛望向苏菲亚，期望听见足够击倒 210 的评判结果。
Bewildered, she looked at Sophia with a furrowed brow, hoping to hear a judgment strong enough to defeat 210.

苏菲亚：我同意，210 获得了胜利。
Sophia: I agree ... 210 has won.

37：……?!
Thirty-seven: ... ?!

37：噢……好吧。
Thirty-seven: Ah ... alright.

原本支撑她挺直肩膀的期望全跑得一干二净。
Her shoulders slumped as all the inspiration that had driven her thus far vanished in a breath.

这次 37 没能马上打起精神。
This time, 37 didn't perk up again.

她垂下脑袋，自顾自地踢起几片细沙，像海鸟一样把头埋到袍子里。
Instead she hung her head and kicked at some sand, before burying her head in her robe like a seabird.

苏菲亚：这本笔记本有的，的确不是教典那般美妙的智慧。
Sophia: It's true ... This notebook doesn't contain the wondrous wisdom of the scriptures.

苏菲亚：这串数字确实也只有我能解出，因为其他人并不了解休。
Sophia: The string of numbers could only be solved by me, because others didn't know Hugh.

苏菲亚：210 率先预估到了结果，这点确凿无疑。
Sophia: 210 was the first to predict this result, that's undeniable.

苏菲亚：——但依照我个人的想法，37 也完成了她的目标。
Sophia: —But I still believe that 37 achieved her goal too.

这句话及时拯救了 37 脚下的沙滩，那儿已经有了浅浅的坑洼。
Sophia's words spared 37 from sinking deeper into the shallow holes she'd already made in the sand with her feet.

她站定在原地，等待苏菲亚接下去要讲的话。
She froze, waiting to hear what Sophia was going to say next.

苏菲亚：无论如何，最初的数字是 37 找到的。是她从尘埃中发掘了这段往事。
Sophia: No matter what you think, it was 37 who first uncovered these numbers, bringing this memory back to me.

苏菲亚：如果没有她的坚持，我不会再听到这首歌。
Sophia: If it wasn't for her determination, I wouldn't have had the chance to hear this song again.

苏菲亚：……我还记得 37 以前告诉我的，那个关于存在无限多质数的证明。
Sophia: ... I still remember what 37 told me, about the proof of the existence of infinite prime numbers.

37：唔……?
Thirty-seven: Hmm ... ?

苏菲亚微笑着看向她。37 不明所以地点了点头。
Sophia smiled at her, as 37 nodded both enthusiastic and confused.

苏菲亚：我的父亲，休，和我一样的除错师，也是上一任负责处理外界事务的人。
Sophia: My father, Hugh, was a Corrector like me. He was the previous person responsible for handling matters off the island.

时日已久，这个名字已化为棱角分明的几何体，抑或一本尘封的笔记，一副摔破的眼镜。
But over time, his name faded into obscurity, leaving behind only a sharp-edged cube, a dusty notebook, and a pair of broken glasses.

苏菲亚：就像 37 曾在沙滩上写下的公式，它早已被海浪抹去。
Sophia: Like the formula 37 once etched on the beach, his memory has long been washed away by the waves.

苏菲亚：休也已经回到了本源之中。
Sophia: Although Hugh's spirit has returned to its source ...

苏菲亚：但我们仍能听见他留下的这首歌。
Sophia: We can still hear the melody he left behind.

苏菲亚：最初唱起这支歌的人或许也已经被时间冲刷，消逝，不复存在……
Sophia: Perhaps the one who first sang this song has been swept away by time, faded into nothingness ...

苏菲亚：但它仍然在响起。
Sophia: But his notes still echo into eternity.

苏菲亚：就像我们仍记得欧几里得两千多年前做出的那个证明。
Sophia: Just as we recall the proof Euclid penned over two thousand years ago.

苏菲亚：正如 37 所说，证明的长久在于它的简单与通用。
Sophia: Like 37 said, the power of proof lies in its simplicity and universality.

苏菲亚：这首曲子里也具有某种普遍性。
Sophia: This tune holds a certain universality too.

苏菲亚：是的，它并非纯粹的数学理论，与本质也毫不相干——
Sophia: Yes, it's not a mathematical theory in the truest sense, and it doesn't speak to the essence—

苏菲亚：只是休留下的闪亮的碎屑，海滩上被映照而折射微光的砂砾。
Sophia: It's only a gleaming shard left by Hugh like grains of sand reflecting faint light on the shore.

苏菲亚：那份普遍性令它仍然在时光中长存，越过了广袤的空间，来到此时此地。
Sophia: Yet, this universality allows it to persist through time, crossing vast spaces, and arriving at this moment and place.

苏菲亚：让我们花一些时间，来听这首歌吧。
Sophia: Let's take a moment to listen to this song.

苏菲亚：只是听一听。
Sophia: To simply listen.

争执和分歧都在轻缓的呼吸声中消逝。
The disputes and differences dissolved in the soft breath of the breeze.

海滩重归寂静，唯独一支歌儿回响。
The beach returned to silence; and only the melody lingered.

辽阔地
Endless Shoreline COL-306611

辽阔地
Endless Shoreline

苏菲亚： 我曾以为旁人的看法对 37 来说不值一提。
Sophia: I used to think other people's opinions didn't matter to 37.

苏菲亚： 即使在更激烈的争执中，她也不曾对此多加关注。
Sophia: Even in the most heated arguments, she never paid them much attention.

苏菲亚： 以寻常的眼睛，无法观测到广阔之物的变化。
Sophia: With ordinary eyes, it's difficult to perceive changes in the vastness beyond us.

苏菲亚： 但我现在已经明白怎样察觉它们——手指抚过几何体时细微的剐蹭，弯腰时捧起的各不相同的沙粒。
Sophia: But now I understand how to notice them. The faint scrape of fingers brushing over geometry, the different grains of sand I scoop up when I bend over.

苏菲亚： 那样的转变太缓慢，但依然存在。
Sophia: The changes are slow and gradual, but they're there.

阿波罗之星已升到了头顶，赫尔墨斯之星的游戏也宣告结束。
Apollo's star had risen high, and the Star of Hermes's game had ended.

该回到那间散落着纸张的研究室了。
It was time to head back to that room filled with scattered papers.

苏菲亚： ……？ 37，你在想什么？
Sophia: ... ? 37, what's on your mind?

37 的步伐反常地缓慢，兴许是那场宣判给了她太大打击。
37's steps were unusually slow. She wondered if the verdict had hit her harder than she predicted.

历来恪尽职守的除错师在此刻有些后悔——也许维持平衡这件事，还是由 6 来最合适。
The ever-scrupulous Corrector began to regret her decision—perhaps it would have been better for 6 to maintain the balance.

37： ……苏菲亚。
Thirty-seven: ... Sophia.

37 沉闷地开头，尾音相较往常更加平板。
37 started somberly, her words flatter than usual.

37： 我并没有浪费你的时间，是吗？
Thirty-seven: I hope I didn't waste your time.

37： 你也认为我做的这些有意义，不只是玩耍而已？
Thirty-seven: Do you think it was all just a pointless game?

她将这些疑惑一股脑儿倒了出来，迫切地等待着回答。
The doubts spilled out of her, eagerly awaiting an answer.

苏菲亚：当然！对我来说，这首歌是十分珍贵的回忆。
Sophia: Of course not! That song means a lot to me, it's a precious memory.

苏菲亚：你不开心吗，37？刚刚共同听歌时，你并没有那么沮丧。
Sophia: Are you upset, 37? You didn't seem so down when we listened to the song earlier.

37：嗯，因为它的韵律很美，你唱得也很好听！
Thirty-seven: Well, that's because it had such a lovely cadence, and you sang it so well!

赞美来得真诚且迅速，不容置疑。
Her praise came sincerely and quickly, no doubt about it.

37：不过让我意外的是，你提起的那个关于无限个质数的证明……
Thirty-seven: But what surprised me was when you mentioned that proof about infinite primes ...

37：我还记得它，但我完全不记得什么时候告诉过你了。
Thirty-seven: I remember it, but I have no idea when I told you about it.

苏菲亚：……
Sophia: ...

苏菲亚：我当然记得，37。那是个很美的证明。
Sophia: Of course, I remember, 37. It was a beautiful proof.

苏菲亚：我会一直记住它的。
Sophia: I'll always remember it.

这话没有起到多少安慰的作用，37 心烦意乱地抓着自己的头发。
But that didn't comfort her much. Distractedly, 37 grabbed at her hair.

37：……所以，我并没有搅乱你和休的回忆，对吗？
Thirty-seven: ... So, have I messed up your memories of Hugh?

37：没有自顾自地跑来，把你的圆打乱，然后留下一地碎屑……
Thirty-seven: Barging in disrupting your memories, and leaving a mess behind ...

苏菲亚微微瞪大了眼。
Sophia widened her eyes slightly.

苏菲亚：……
Sophia: ...

苏菲亚：37，你难道还在介意 210 说的话吗？
Sophia: 37, are you still bothered by what 210 said?

她的目光移开了——这真是少有。
She averted her eyes—that was rare.

苏菲亚：……哈哈哈哈！
Sophia: ... Hahaha!

37：?！苏菲亚，你在笑什么？
Thirty-seven: Sophia, what's so funny!?

苏菲亚：抱歉……只是没想到你竟然会在意他说的话。
Sophia: Sorry ... I just never thought I'd see you care about something he said.

苏菲亚：你说得对，和过去比起来，你确实有许多变化。
Sophia: You're right, you really have changed a lot after all.

37：当然了！我不是说过吗?
Thirty-seven: Of course! Didn't I tell you that?

37：除了身高，其实我在餐桌上选择的座位也变了。
Thirty-seven: It's not just my height ... I've even changed where I sit at the table.

37：因为我与桌面的距离在变化，最好的晒太阳角度就会跟着改变。
Thirty-seven: As the distance between me and the table changes, so does the best angle for catching the sun.

苏菲亚：不仅仅是身高或座位……
Sophia: I'm not talking about height or seats ...

苏菲亚带着笑意，轻轻摇了摇头。
Sophia shook her head with a soft smile.

童年结束后，她很少如此柔软。
It was a gentle, rare, loving gesture.

苏菲亚：37，你知道我为何会一直记得那个无限质数的证明吗?
Sophia: 37, do you know why I've never forgotten that proof about infinite primes?

苏菲亚：因为它让我第一次去思考那样遥远的事物。
Sophia: Because it made me ponder such distant things for the first time.

苏菲亚：过去我不会关心何谓永恒，因为这更像不可捉摸的传言。
Sophia: Before, I didn't care about what "eternity" meant; it felt like nothing. Some far away notion.

苏菲亚：现在我站在这儿，非常清楚脚下的岛屿终有一天会消失，像细沙被海潮冲走。
Sophia: Now I stand here, fully aware that the island under our feet will one day disappear, washed away like sand by the tide.

苏菲亚：——但我也相信一些东西会长久地留存，如同埋藏于泥沙中的金粒。
Sophia: —But I also believe some things will endure, like grains of gold buried in the silt.

岛屿足够宽广，能容下整个学派的人在此定居。
The island was vast enough to house an entire school of thought.

同样，岛屿也如此微末，只是处在波浪之中的一个小点。
Yet it was also so small, a speck in the waves.

置身其中的生命所能记住的，也不过是一些短暂的瞬间。
And we, living amidst it, could only remember fleeting moments.

37：嗯，因为现象世界都是易朽的。
Thirty-seven: Yes, because the world we see is transient.

37 煞有介事地点了点头，对她来说这样的话题比吃饭更加寻常。
37 nodded seriously; this topic was more familiar to her than discussing dinner plans.

苏菲亚：你把它分享给了我，因为里面蕴含的永恒和无限之美，它普遍的正确性。从此，我看见了砂砾中的黄金。
Sophia: You shared it with me because of the eternity and beauty that the infinite holds, and its universally true nature. From then on, I've seen the gold in the sands.

苏菲亚：而我把休留下的歌儿分享给了你。它令你快乐，因此它对你也有了意义。
Sophia: And in turn, I shared Hugh's song with you. If it brought you joy, that means it has meaning for you too.

苏菲亚：这或许不是你所寻求的超验的智慧。但听过这首歌的人会感受它，记住它——或许有一天随口哼起。
Sophia: Maybe it's not the transcendent essence you were seeking. But those who hear the song will feel it, remember it—maybe even hum it one day.

苏菲亚：这也是普遍的美丽。
Sophia: That is universal beauty too.

37：……！原来是这样——我完全明白了！
Thirty-seven: ... ! So that's it—I get it now!

37 脸上的困惑迅速褪去，她又恢复了往常快活的模样。
The confusion vanished from 37's face, and she returned all at once to her usual cheerful self.

37：这支歌儿不再只属于休和苏菲亚了，因为你把它分享给了我们……对吗？
Thirty-seven: This song isn't just for Hugh and Sophia anymore because you shared it with us ... right?

37：它因此拥有了普遍性，属于听过它的每一个人！就像我分享给你的证明！
Thirty-seven: So it's universal and belongs to everyone who hears it! Just like the proof I shared with you!

37：……为什么你又笑了，苏菲亚？
Thirty-seven: ... Why are you laughing again, Sophia?

苏菲亚：……不，没什么。
Sophia: ... Oh, it's nothing.

苏菲亚：只是在想，你好像非要把所有事都转化为证明才能理解似的……
Sophia: I'm just thinking about how you're always turning everything into a proof to understand it ...

苏菲亚：明明只是和朋友一起听歌这样简单的事。
Sophia: When it's as simple as enjoying music with friends.

37：……唔！
Thirty-seven: ... Hmm!

37：看来我对简单的体会还不够深……
Thirty-seven: I suppose I still can't quite grasp this kind of simplicity ...

37 苦苦思索起来。
37 thought hard about this, puzzling over it like a new problem.

好在，她马上又想到了新点子。总是如此。
But thankfully, she soon had a new idea, as always.

37：“分享”真的是一个非常好的论点——我笃定 210 很难提出反对！
Thirty-seven: "Sharing" is really a solid argument—I bet 210 would struggle to argue against it!

37：我的观点是正确的！我现在就把这个告诉他！
Thirty-seven: I knew my viewpoint was right! I'm going to tell him right away!

苏菲亚：……
Sophia: ...

37 跑向前方，追上了正在翻看杂志的 210。
37 hurried off and caught up with 210, who was leafing through another magazine.

210：噢，那又如何？苏菲亚宣告我取得胜利的事实并不会随之改变。
210: What now? Sophia's declared I won and nothing can change that.

37：你只是在看热闹，做些随意的猜测，而我找到了那支重要的歌！
Thirty-seven: You were just a spectator, making random guesses, while I uncovered a valuable song!

210：随你怎么想——我今天已经说了够多的话，决定独自待一会儿。
210: Believe what you want—I've said enough today; I'd like a bit of peace and quiet now.

他刻意放缓了脚步，落在苏菲亚与 37 身后。
He deliberately slowed down, trailing behind Sophia and 37.

37 将此当作 210 妥协的宣告，步伐也跟着变得轻快。
37 took it as 210 conceding, and her steps became light as air.

37：嗯，除了不重要的细节，今天的一切都很顺利。
Thirty-seven: Well, except for some trivial details, everything went smoothly today.

37：是数字“9”，三倍的和平、友谊与和谐。非常完美。
Thirty-seven: It's the number "9", the trinity of peace, friendship, and harmony. Absolutely perfect.

37：对了！
Thirty-seven: Oh, that's right!

像是突然想起了什么，37 转向苏菲亚，愉快地笑起来。
37 turned to Sophia with a sudden recollection, a joyful smile spreading across her face.

37：来，苏菲亚，伸手——
Thirty-seven: Come on, Sophia, give me your hand—

37：这个给你。
Thirty-seven: This is for you.

羽毛，贝壳与小石头串成的漂亮装饰物落入手中。
The feathers, shells, and pebbles formed a lovely decorative chain.

旁边还有一块孤零零的卵石。
There was a lone pebble next to it.

苏菲亚：……这是给我的?
Sophia: ... Is this for me?

37：当然！还有这个，我刚刚在海滩上发现了这枚石头。
Thirty-seven: Of course! And this one, I found it on the beach just now.

37：它的纹路拼成的数字很棒！你可以让它加入这串项链——或者，拿去打水漂！
Thirty-seven: The pattern forms a fantastic number! You can add it to the chain or, you know, give it a toss into the waves!

苏菲亚：……
Sophia: ...

苏菲亚：谢谢你，37。
Sophia: Thanks, 37.

37：我早上到沙滩这儿来的时候，就想把它拿给你。
Thirty-seven: I came to the beach this morning to give it to you.

37：那时候我忙着思考别的，这件事被忘了个干净……
Thirty-seven: But I found myself sidetracked and completely forgot ...

苏菲亚：最后我还是收到了礼物，所以没关系。
Sophia: That's alright, 37, I really appreciate your gift.

37：那就好！明天我们还会一起玩儿吗，苏菲亚？我很快就能赶上研究进度的。
Thirty-seven: That's great! Shall we hang out again tomorrow, Sophia? I'll catch up with my research in no time.

37：哦，大后天也行，我们可以让它变成岛上的固定项目——
Thirty-seven: Oh, the day after tomorrow could work too. We could make this a regular island activity —

苏菲亚：……
Sophia: ...

眼下是一个很好的机会，轻松，愉快，足以让她把未讲的话问出口。
Now was the time, relaxed and pleasant enough, for her to ask what she had left unsaid.

苏菲亚：37，对你来说，所有的数都一样吗?
Sophia: 37, do all these numbers have this infinite meaning to you?

37：当然了。
Thirty-seven: Of course.

没有丝毫犹豫，37 立刻回答。
37 answered without missing a beat.

苏菲亚：你也认为 37 只是一个数字吗?
Sophia: So 37 is just one number in the infinite progression?

37：如果不是数，它又是什么呢?
Thirty-seven: If it's not, what else could it be?

37：210，37，6……即使我们不在这儿了，这些数也不会随之消失。
Thirty-seven: 210, 37, 6 ... Even if we're gone, these numbers won't disappear.

37：同样，也不需要 3 只海鸥，3 块石头，3 个人来证明 3 的存在。
Thirty-seven: Just like you don't need three seagulls, three stones, or three people to prove the number three exists.

37：数字只是一直在那里。
Thirty-seven: Numbers exist outside of all that.

苏菲亚：……
Sophia: ...

苏菲亚：谢谢你，37。这是很好的答案。
Sophia: Thanks, 37. I think I understand your answer.

苏菲亚：我想我得先处理剩下的事务。如果还有时间，我们总能一起玩的。
Sophia: I've got some other things to take care of. Let's hang out later if there's time.

37：那就说好了!
Thirty-seven: Deal!

37：噢，等等，我看见 6 散步回来了!
Thirty-seven: Wait, I see 6 coming back!

37 望向远处逐渐步近的小点，一只海鸥正在上方盘旋。
37 waved at the dot on the horizon, as a seagull swooped above them.

她蹦起来，很高兴地朝领袖打招呼。
She sprang up, greeting the leader.

37：上午好，6！我和 210 对一件事有不同想法……
Thirty-seven: Good morning, 6! 210 and I had a disagreement over something ...

37：简单来说，这个数列与一首歌有关……
Thirty-seven: But the sequence, it's connected to a song ...

6：我并不具备你所认为的鉴赏能力。
Six: I'm afraid I don't know much about songs.

37：但你很讲道理，不是吗？
Thirty-seven: But it's only logical, isn't it?

37：有哪条教义适用于这种情况吗？
Thirty-seven: Is there any doctrine from our past that fits this situation?

6：……
Six: ...

6：沉思能够带来智识的净化。
Six: Thinking things through can help purify one's intellect.

6：也许保持一段时间的静默能帮助你。
Six: Perhaps a period of quiet contemplation would be helpful.

37：这不适合我。好吧，我会自己想出更有说服力的新论点。
Thirty-seven: That doesn't suit me well, I'm afraid. Alright, I'll come up with more convincing new arguments on my own.

看得出来，37 对 6 给出的方案不够满意。
It was clear that 37 wasn't satisfied with 6's suggestion.

在接下来的日子里，讨论还将持续下去。
The debate would keep going in the coming days.

苏菲亚：走路的时候得注意前方，否则很容易摔伤。
Sophia: Watch your step, or you'll trip.

37：没关系，只要按照固定的顺序迈出脚步，就不会有问题！
Thirty-seven: Don't worry. As long as I stick to the right order of steps, I won't fall!

210：容我提醒，得再快点儿才不会错过用餐时间。
210: Don't forget, we've got to hurry or we'll miss mealtime.

210：这只海鸥看起来也饿得够呛。
210: That seagull looks as starved as her.

37：我们数出走了多少步，就可以借此计算海鸥飞行的速度……
Thirty-seven: We could calculate the seagull's speed by counting steps ...

37：刚才数到哪里了？
Thirty-seven: Where did we stop counting?

210：你大可以明天待在沙滩上数一整天海鸥。
210: You can spend all day counting seagulls on the beach tomorrow.

210：噢，我的下篇投稿以此为题也不错。
210: That could be the topic for my next essay.

37：你又要用一堆形容词掩饰论证的缺乏吗？
Thirty-seven: Planning to cover up a weak argument with a bunch of superfluous dribble again?

苏菲亚：好了，快走吧。
Sophia: Alright, you two let's pick up the pace.

苏菲亚：还有其他方法可以算出它的速度。
Sophia: There are other ways to figure out its speed.

6：284 步。
Six: 284 steps.

37: 谢谢你，6！

Thirty-seven: Thanks, 6!

37: 走到这儿花费的时间是……

Thirty-seven: And the time it took us to get here is ...

THE END

THE END
